318 No sex difference in yolk steroid concentrations of mountain chickadees: features of male-female mating behaviour by male damselflies and bees?

314 Spatial encoding in mountain chickadees: features of male-female mating behaviour by male damselflies and bees?

310 Ultraviolet vision and foraging in diving birds: the phylogenetic extent of the effect and the potential role of winter temperatures

306 Continental variation in relative hippocampal volume: a twin study

303 Sensitivity to dimethyl sulphide suggests a mechanism for olfactory navigation by seabirds

300 A Romani mitochondrial haplotype in England 500 years before their recorded arrival in Britain

297 Genetic diversity predicts pathogen resistance and cell-mediated immune competence in house finches

294 Continentality variation in relative hippocampal volume: a twin study

291 Terminal reproductive effort in a marsupial

288 Reversible switches between male–male and male–female mating behaviour by male damselflies and bees?

285 Genetic diversity predicts pathogen resistance and cell-mediated immune competence in house finches

282 Genetic diversity predicts pathogen resistance and cell-mediated immune competence in house finches

280 A Romani mitochondrial haplotype in England 500 years before their recorded arrival in Britain

277 Image content influences men's semen quality

274 Women's preference for dominant male odour: effects of menstrual cycle and relationship status

271 Genetic influences on variation in female orgasmic function: a twin study

268 Reversible switches between male–male and male–female mating behaviour by male damselflies and bees?

265 Image content influences men's semen quality

262 Continental variation in relative hippocampal volume: a twin study

259 Genetic diversity predicts pathogen resistance and cell-mediated immune competence in house finches

256 Women's preference for dominant male odour: effects of menstrual cycle and relationship status
