Animal behaviour

55 Passive internal dispersal of insect larvae by migratory birds

1 Defending against parasites: fungus-growing ants combine specialized behaviours and microbial symbionts to protect their fungus gardens

20 Avian mothers create different offspring weights for localizing or siblicide

65 Latitudinal and longitudinal barriers in global biogeography

Biomechanics

12 FAecal glucocorticoid metabolites and their role in trade-offs in field crickets

94 Modelling the extinction of Steller’s sea cow

Mammals

62 Ageing and the evolution of female longevity

98 High olfactory sensitivity for dimethyl sulphide in harbour seals

Physiology

105 The scaling and temperature dependence of vertebrate metabolism

116 A primitive protostegid from Australia and early sea turtle evolution

Population ecology

144 Genetic diversity in butterflies: interactive effects of habitat fragmentation and climate-driven range expansion

155 Early history of European domestic cattle as revealed by ancient DNA
