Animal behaviour
353 Availability of non-carotenoid antioxidants affects the expression of a carotenoid-based sexual ornament
T. W. Pike, J. D. Blount, J. Lindström & N. B. Metcalfe
357 It is time to move: linking flight and foraging behaviour in a diving bird
D. Pelletier, M. Guillermont, J.-M. Grandchamp & P. J. Butler
360 The uniquely human capacity to throw evolved from a non-throwing primate: an evolutionary dissociation between action and perception
J. N. Wood, D. D. Glynn & M. D. Hauser
364 Violations of transitivity under fitness maximization
371 From cradle to early grave: juvenile mortality in European shags results from inadequate development of foraging proficiency
F. Daunt, V. Afanasyev, A. Adam, J. P. Croxall & S. Wanless
375 Do carotenoids buffer testosterone-induced immunosuppression? An experimental test in a colourful songbird
K. J. McGraw & D. R. Ardia
379 False promises: females spurn cheating males in a field cricket
W. E. Wagner Jr, A. R. Smith & A. L. Basolo
382 Female red deer prefer the roars of larger males in a field
B. D. Charlton, D. Reby & K. McComb
386 Fitness increases with partner and neighbour allopreening
S. Lewis, G. Roberts, M. P. Harris, C. Prigmore & S. Wanless

Community ecology
390 Psychological benefits of greenspace increase with biodiversity
R. A. Wager Jr, A. R. Smith & A. L. Bava
392 Female red deer prefer the masts of larger males
R. D. Charlton, D. Reby & K. McComb
396 Fitness increases with partner and neighbour allopreening
S. Lewis, G. Roberts, M. P. Harris, C. Prigmore & S. Wanless

Evolutionary biology
195 Extreme sex ratio variation in relation to change in condition around conception
F. Z. Cameron & W. L. Linklater
398 Primates follow the 'island rule': implications for interpreting Homo floresiensis
L. Brown & M. Caroll
401 Twin innominate organs of Drosophila for traumatic insennation
Y. Kamimura
405 The benefits of bathing buds: water calyces protect flowers from a microlepidopteran herbivore
J. E. Carlton & K. E. Harris
406 Costly steroids: egg testosterone modulates nestling metabolic rate in the zebra finch
411 An increase in pH boosts olfactory communication in sticklebacks
J. Heuschele & U. Candolin
414 Elevated frequency of abnormalities in barn swallows from Chernobyl
A. P. Müller, T. A. Mousseau, F. de Lope & N. Jarvi
418 Nestling immune response to phytohaemagglutinin is not inheritable in collared flycatchers
N. Pla, L. Gutierrez, J. Senseca & J. E. Brommer
422 Antimicrobial defences increase with sociability in bees
425 Virgin birth in a hammerhead shark
D. D. Chapman, M. S. Shroy, E. Louis, J. Sommer, H. Fletcher & P. A. Prudho
428 The olfactory receptor gene repertoires in secondary-adapted marine vertebrates: evidence for reduction of the functional proportions in cetaceans
T. Kishida, S. Kobata, Y. Shiyama & H. Furan
431 Male soldier caste larvae are non-aggressive in the polyembryonic wasp Copidosoma floridanum
D. Green, J. A. Harvey, J. A. Johnson & M. R. Strand
435 Kin recognition in an annual plant
S. A. Dooley & A. T. Fil
439 Positive natural selection has driven the evolution of the Hsp70s in Drosophila species
J. Starrett & E. R. Waters

Physiology
445 The mechanical power requirements of avian flight
G. N. Alden & D. J. Shelley
449 The uniquely human capacity to throw evolved from a non-throwing primate: an evolutionary dissociation between action and perception
J. N. Wood, D. D. Glynn & M. D. Hauser
360 The uniquely human capacity to throw evolved from a non-throwing primate: an evolutionary dissociation between action and perception
J. N. Wood, D. D. Glynn & M. D. Hauser

Population genetics
449 Bayesian inference of population expansions in domestic livestock

Molecular evolution
439 Positive natural selection has driven the evolution of the Hsp70s in Drosophila species
J. Starrett & E. R. Waters

Published in Great Britain by the Royal Society, 6–9 Carlton House Terrace, London SW1Y 5AG
Founded in 1660, the Royal Society is the independent scientific academy of the UK, dedicated to promoting excellence in science
Registered Charity No 207043

ISSN 1744-9561
volume 3 number 4 pages 353–452
