Editorial Board

Brian Charlesworth, Editor
School of Biological Sciences, University of Edinburgh
Kathryn Arnold
division of Environmental and Evolutionary Biology, University of Glasgow
Phoebe Barnard
Global Change Research Group, Kirstenbosch Research Centre
Andrew Beswick
Cambridge University, Harvard University
John Boulding
Department of Ecology and Evolutionary Biology, University of California, Los Angeles
Lindell Bromham
School of Biology and Zoology, Australian National University
John Brockfield
Institute of Genetics, University of Nottingham
Rob Brooks
School of Biological, Earth and Environmental Sciences, University of New South Wales
Richard Byrne
School of Psychology, University of St Andrews
Jean-Claude Car胞
School of Biological Sciences, Royal Holloway, University of London
Tom Cavalier-Smith
Department of Zoology, University of Oxford
Tracy Chapman
Department of Biological Sciences, University of East Anglia
Phil Clapham
Allen-Bradley Science Center, National Marine Mammal Laboratory
Tom Davel
Biology Department, University of Washington
Laurent Duret
Laboratoire Evolution et Biologie Evolutive, CNRS
Hans Ellegren
Anatomi och Embryologi, Uppsala University
Richard Forsey
Department of Paleontology, The Natural History Museum, London
Chris Frith
Wellcome Department of Cognitive Neurosciences, University College London
Jacques Gauthier
Division of Animal Evolutionary Psychology, Yale University

Biology Letters

Editor
Professor Brian Charlesworth
Publishing Editor Fiona Pring

AIMS AND SCOPE
Launched as an independent journal in 2005 Biology Letters is a primarily online, peer-reviewed journal that publishes high-quality articles from across the biological sciences. The scope of Biology Letters is vast: publishing high-quality research in any area of the biological sciences. However, we have particular strengths in the biology, evolution and ecology of whole organisms. Articles submitted to Biology Letters benefit from its broad scope and readiness, dedicated media promotion, and an average turnaround time of 6 weeks to first decision. The journal is particularly suited to research that requires high visibility due to its cross-disciplinary nature or novel findings.

SUBSCRIPTIONS
In 2008 Biology Letters (ISSN 1744-9561) will be published bimonthly, with six issues a year. Full details of subscriptions may be obtained either by contacting our journal fulfillment agent, Portland Customer Services, Commerce Way, Cockchett C20 BP; tel. (401) 206 796351; fax (401) 206 796335; email sales@portland-services.com or by visiting our website at publishing.royalsociety.org/subscribers. From 2008 personal subscriptions are available for this journal—at prices. Full ordering information can be obtained from Portland Customer Services. These rates apply to bona fide individual use only. They must be paid by personal cheque or credit card, and orders cannot be delivered to an institutional address. The Royal Society is Registered Charity No 207043.

GUIDANCE FOR AUTHORS

Subscription
Papers published in Biology Letters will be categorized by subject, which include:
- molecular evolution
- neurobiology
- palaeontology
- pathogen biology
- phylogeny
- physiology
- population ecology
- population genetics

Electronic Submission details
The Royal Society’s electronic-submission and peer-review service provides Biology Letters authors with the facility to submit their papers online. The service allows you to upload files in a reliable and user-friendly way, using a Web-based system. When your paper is received, an immediate acknowledgement is sent that tells how you can track your contribution online.

For full submission guidelines and access to all journal content please visit the Biology Letters website, see publishing.royalsociety.org for further details.

The Royal Society is an independent scientific academy founded in 1660 and self-governing under Royal Charter. The Society has three roles, as the scientific academy of the United Kingdom, as a learned society, and as a funding body.

The objectives of the Royal Society are to:
- recognize excellence in science
- support leading-edge scientific research and its applications
- stimulate international interaction
- further the role of science, engineering and technology in society
- promote the public’s understanding of science
- provide independent authoritative advice on matters relating to science, engineering and technology
- encourage research into the history of science

For further information on the Society’s activities, please contact the following departments on the extensions listed by dialing +44 (0)20 7839 5561, or visit the Society’s Web site (www.royalsociety.org).

Research Support (UK grants and fellowships)
Research grants: 2539
Conference grants: 2540

Science Advice
General enquires: 2585
Science Communication
General enquiries: 2572

International Exchanges (for grants enabling researchers to work in the UK and most other countries (except the USA))
General enquiries: 2550

Library and Information Services
Library/archive enquiries: 2606

Cover image: Acid-extracted left optic capsule of the 400 Myr-old placoderm Mmiandelaps from Birubi, New South Wales. (See pages 110–114, Mico-X-ray tomography by Alphit; Tim Senden, 3D rendering using ‘Drift3’ by Dr Ayu Limaye.)
