645 Learning decreases heterospecific helping behaviour and regard. We know that the wasps ‘know’: Optimality in a partitioned task. Implications of multiple mating. Why do fiddler crabs build chimneys? Exposure to infant scent lowers serum testosterone in father common fawn cusk-eel. Birds.

603 Seasonal variation in sonic muscles in the Petromyzon marinus: an exception to the rule of homing in anadromous fishes. J. Waldman, C. Grunwald & J. Virgin
663 Host manipulation as a parasite transmission strategy when manipulation is exploited by non-host predators. O. Steppä & J. Jokela
670 Queen number influences the timing of the sexual reproduction in colonies of Carnival/maize ants. M. Sarfati, S. Cremer, J. Odert & J. Hurle
674 Genetic covariation between effectiveness and cost of defence in aphids. C. Verhaeghe, A. Goussat & S. van Burg
Global change biology
687 Methane emissions by alpine plant communities in the Qinghai–Tibet Plateau. C. Cao, X. Xu, R. Long, Q. Wang, C. Yang, Y. Du & S. Zhao
685 Asian migrants adjust migration in response to environmental conditions on route. A. P. Tundup, K. Thapar, K. Rainio, B. Y. Zhou, E. Lehikoinen & C. Rahbek
690 Effects of naturally acidified seawater on seagrass calcareous epibionts. S. Marzo, R. Rudik-Malagui, E. Baranov, S. Bosley, M.-C. Brak, J. P. Cattan & J. Pail-Jacop
Marine biology
695 Opinion piece: The dangers of ignoring stochastic stock complexity in fisheries management the case of the North Sea cod W. F. Hutchinson
696 A threat to commercial reefs multiplied? four species: crow-of-thorns starfish (A. Tundup, J. Stenseth, P. R. Haddrill, P. M. Harris & C. Hamer
646 Hit by the buffers, conspecific aggression undermines benefits of colonial breeding under adverse conditions. A. Lowry, S. Wielans, M. J. Benton, M. Ruta & C. Hamer
654 We know that the wasps know: cryptic queens to the queen in Aptisinae. A. Bhadra & R. Gadagkar
660 Reproductive suppression in female cooperatively breeding cichlids. R. A. Slatyer, E. S. Y. Fok, R. Hocking & R. E. Y. Baden
692 Circle in the migrants caught on migration. T. Coppack, J. F. Becker & P. J. Becker
616 Why do fiddler crabs build chimneys? R. A. Staley, E. S. Y. Fok, R. Hocking & R. E. Y. Baden
619 Circadian flight schedules in migrant birds caught on migration. T. Coppack, J. F. Becker & P. J. Becker
621 Implications of multiple mating for offspring relatedness and staving behaviour in juvenile guppies. J. P. Evans & J. L. Kelley
627 Optimality in a partitioned task performed by social insects. M. Ruta & J. R. Dor
630 Hitting the buffers, conspecific aggression undermines benefits of colonial breeding under adverse conditions. A. Lowry, S. Wielans, M. J. Benton, M. Ruta & C. Hamer
634 We know that the wasps ‘know’: Optimality in a partitioned task. Implications of multiple mating. Why do fiddler crabs build chimneys? Exposure to infant scent lowers serum testosterone in father common fawn cusk-eel. Birds.
