

Editorial

- 1 **Editorial**
B. Charlesworth

Evolutionary biology

- 3 **Meshing molecules and management: a new era for natural resource conservation**
E. K. Latch & J. A. Ivy

Animal behaviour

- 5 **Reversed optimality and predictive ecology: burrowing depth forecasts population change in a bivalve**
J. A. van Gils, C. Kraan, A. Dekinga, A. Koolhaas, J. Drent, P. de Goeij & T. Piersma
- 9 **Sleeping gulls monitor the vigilance behaviour of their neighbours**
G. Beauchamp
- 12 **Vocal cues of ovulation in human females**
G. A. Bryant & M. G. Haselton
- 16 **Grunting for worms: seismic vibrations cause *Diplocardia* earthworms to emerge from the soil**
O. Mitra, M. A. Callahan Jr, M. L. Smith & J. E. Yack
- 20 **Mating behaviour in *Lymnaea stagnalis* pond snails is a maternally inherited, lateralized trait**
A. Davison, H. T. Frend, C. Moray, H. Wheatley, L. J. Searle & M. P. Eichhorn
- 23 **An infanticide attempt by a free-roaming feral stallion (*Equus caballus*)**
M. E. Gray
- 26 **Comment. Potential confounds to an assay of cross-generational fitness benefits of mating and male seminal fluid**
T. A. F. Long, A. D. Stewart & P. M. Miller
- 28 **Invited reply. Support for a pluralistic view of behavioural evolution**
N. K. Priest, D. A. Roach & L. F. Galloway

Biomechanics

- 30 **The recruitment of different compartments within a muscle depends on the mechanics of the movement**
J. M. Wakeling

Conservation biology

- 35 **Diversity and depletions in continental carnivore guilds: implications for prioritizing global carnivore conservation**
F. Dalerum, E. Z. Cameron, K. Kunkel & M. J. Somers
- 39 **Scale effects in species distribution models: implications for conservation planning under climate change**
C. Seo, J. H. Thorne, L. Hannah & W. Thuiller

Evolutionary biology

- 44 **Opinion piece. Evolution and evolvability: celebrating Darwin 200**
J. F. Y. Brookfield
- 47 **Palaeogenomics of pterosaurs and the evolution of small genome size in flying vertebrates**
C. L. Organ & A. M. Shedlock
- 51 **The role of predator selection on polymorphic aposematic poison frogs**
B. P. Noonan & A. A. Comeault
- 55 **No evidence for an evolutionary trade-off between learning and immunity in a social insect**
A. Alghamdi, N. E. Raine, E. Rosato & E. B. Mallon
- 58 **Selection on sperm morphology under relaxed sperm competition in a wild passerine bird**
S. Calhim, H. M. Lampe, T. Slagsvold & T. R. Birkhead
- 62 **Circum-menopausal effects on women's judgements of facial attractiveness**
J. Vukovic, B. C. Jones, L. M. DeBruine, A. C. Little, D. R. Feinberg & L. L. M. Welling

Global change biology

- 65 **Comment. Crying wolf: concluding that wolves were not restored**
L. D. Mech
- 67 **Invited reply. Wishful thinking: imagining that the current Great Lakes wolf is the same entity that existed historically**
J. A. Leonard & R. K. Wayne

Marine biology

- 69 **Diel vertical migration of Arctic zooplankton during the polar night**
J. Berge, F. Cottier, K. S. Last, Ø. Varpe, E. Leu, J. Søreide, K. Eiane, S. Falk-Petersen, K. Willis, H. Nygård, D. Vogedes, C. Griffiths, G. Johnsen, D. Lorentzen & A. S. Brierley
- 73 **Fish ears are sensitive to sex change**
S. P. W. Walker & M. I. McCormick

Neurobiology

- 77 **Daytime micro-naps in a nocturnal migrant: an EEG analysis**
T. Fuchs, D. Mury, F. R. Moore & V. P. Bingman

Palaeontology

- 81 **Parallels between playbacks and Pleistocene tar seeps suggest sociality in an extinct sabretooth cat, *Smilodon***
C. Carbone, T. Maddox, P. J. Funston, M. G. L. Mills, G. F. Grether & B. Van Valkenburgh

Physiology

- 86 **Metabolic ageing in individual zebra finches**
B. Moe, B. Rønning, S. Verhulst & C. Bech

- 90 **Autotomy reduces immune function and antioxidant defence**
S. Slos, M. De Block & R. Stoks
- 93 **The evolution of water balance in *Glossina* (Diptera: Glossinidae): correlations with climate**
E. Kleynhans & J. S. Terblanche
- 97 **Comment. Artiodactyl 'success' over perissodactyls in the late Palaeogene unlikely to be related to the carotid rete: a commentary on Mitchell & Lust (2008)**
C. Janis
- 99 **Invited reply. Artiodactyl success and the carotid rete**
G. Mitchell & A. Lust

Population genetics

- 101 **Genetic analysis of historic western Great Lakes region wolf samples reveals early *Canis lupus/lycaon* hybridization**
T. Wheelodon & B. N. White

Special feature
Brain evolution

Guest edited by Tom V. Smulders

- 105 **Introduction. Darwin 200: special feature on brain evolution**
T. V. Smulders
- 108 **Opinion piece. Exploring the early origins of the synapse by comparative genomics**
K. S. Kosik
- 112 **Opinion piece. Evolutionary conservation of mechanisms for neural regionalization, proliferation and interconnection in brain development**
H. Reichert
- 117 **Opinion piece. Non-laminar cerebral cortex in teleost fishes?**
H. Ito & N. Yamamoto
- 122 **Opinion piece. Avian evolution: from Darwin's finches to a new way of thinking about avian forebrain organization and behavioural capabilities**
A. Reiner
- 125 **Why are there so few smart mammals (but so many smart birds)?**
K. Isler & C. P. Van Schaik
- 130 **Opinion piece. Revisiting the cognitive buffer hypothesis for the evolution of large brains**
D. Sol
- 134 **Opinion piece. Telencephalon enlargement by the convergent evolution of expanded subventricular zones**
G. F. Striedter & C. J. Charvet
- 138 **Opinion piece. The relevance of brain evolution for the biomedical sciences**
T. V. Smulders
- 141 **Opinion piece. Adult hippocampal neurogenesis of mammals: evolution and life history**
I. Amrein & H.-P. Lipp

Founded in 1660, the Royal Society is the independent scientific academy of the UK, dedicated to promoting excellence in science
