Meeting report

145 Biodiversity research sets sail: showcasing the diversity of marine life
T. J. Voss

Animal behaviour

146 Tactical reproductive parasitism via larval cannibalism in Peruvian poison frogs
J. S. Brozer, V. Mórica & K. Serramos

152 From coprophagy to predation: a dung beetle that kills milipedes
P. H. Larson, A. Lopera, A. Ferryman & E. Gómez

156 Sexual segregation of pelagic sharks and the potential threat from fisheries
M. C. O. Ferrari & D. P. Chivers

158 Latent inhibition of predator performance in an aggressive context
A. S. Dalbo, S. Novick & W. A. Sterry

160 Lactating red squirrels experiencing a small cuckoo host
A. M. Antrobus, B. C. Stokoe, A. Mikola & F. Nesti

163 Swamp sparrows modulate vocal performance in an aggressive context
A. S. Dall, S. Novick & W. A. Sterry

165 Evidence for egg discrimination preceding failed rejection attempts in a small cuckoo host
A. Antrobus, B. C. Stokoe, A. Mikola & F. Nesti

172 Calculated reciprocity after all: computation behind token transfers in orang-utans
V. Dubuc, M. Pak, M. Nunn, B. Thierry & J. Call

174 Indirect cues of nest predation risk and avian reproductive decisions
M. Morishima, T. Yamamoto, S. Kuramoto & Y. Watanabe

179 Ostracod level and opportunistic mating in women
K. M. Durante & N. P. Li

183 Production and perception of oestradiol level and opportunistic
V. Dufour, M. Pelé, M. Neumann, E. Røskaft

186 Interactions between background
P. G. D. Feulner, M. Plath, J. Engelmann, D. M. Reding, J. T. Foster, H. F. James, B. Raymond, R. J. Ellis & M. B. Bonsall

191 Measuring effects on sparrow phenotype and motion during visual detection can explain why cryptic animals are hard to
C. C. Ioannou & J. Krause

194 Free amino acids as phagostimulants in cricket nuptial gifts: support for the ‘CANDY’ hypothesis
S. Warneke, B. Vahle, D. Raubenheimer & S. J. Simpson

197 The impact of host aggressiveness on sex allocation by the gregarious parasitic wasp Crinum plumbeum (L.)
S. Tanaka

Biomechanics

200 Suction is kid’s play: extremely fast suction in newtswater
S. Van Wassenbergh, C. Ross
A. Gentilegga, P. Uyen, P. Aerts, D. Adrians & A. Herrel

Conservation biology

204 Opinion piece. Marine mammals’ influence on ecosystem processes affecting fisheries in the Barents Sea is trivial
P. J. Conklin

207 Tropical deforestation alters hummingbird movement patterns
A. S. Hedley & M. C. Bels

211 Comment. Selective harvesting with equations for mate recognition: comment on ‘Should hunting mortality mimic the patterns of natural mortality?’
R. B. O’Farra

213 Invited reply. Without or with equations: what are the dose don’ts of hunting?
R. Bisch, A. Mysterud & J. E. Swenson

217 Moderate pathogen-induced mortality: the role of density in Brevicillium fungorum virulence
B. Raymond, R. J. Ellis & M. R. Bonsall

221 Convergent evolution of ‘creepers’ in the Hawaiian honeycreeper radiation
D. M. Reding, J. T. Foster, H. F. James, B. Raymond, R. J. Ellis & M. B. Bonsall

224 Opinion piece. Darwin’s ‘one special difficulty’ - celebrating Darwin 200
J. M. Moores

228 The movement of motion-defined contours can bias perceived position during simultaneous reciprocal traction
D. A. Pála

231 Evolutionary biology

234 Relationships between population size and fecundity in a long-lived
J. M. Moores, T. T. Sutton, J. T. Foster, H. F. James, B. Raymond, R. J. Ellis & M. B. Bonsall

236 Population genetics

238 Costs of reproduction in a long-lived bird: large clutch size is associated with low survival in the presence of a highly virulent disease
S. Descamps, H. G. Gilchrist, J. Bêty, E. Wapstra & M. Olsson

244 Sites of evolutionary divergence differ between olfactory and gustatory receptors of Drosophila
A. Gardner, K. R. Butler, W. C. Jordan & M. G. Betts

246 Opinion piece. Marine mammals’ influence on ecosystem processes affecting fisheries in the Barents Sea is trivial
P. J. Conklin

248 Potential impacts of climate change on the winter distribution of Afro-Palaearctic migrant passerines
M. Rüttner-Maeser, E. A. Walther, W. Thuller, C. Rabeh & E. J. Pijper

252 Extreme weather events influence dispersal of naivé northern fur seals

Marine biology

254 Marine hybrid hotspot at Indo-Pacific biogeographic border
J. P. Holmes, A. J. Fresch, G. R. Allen & T. Van Hoorn

260 Parental effects on offspring life histories: when are they important?
J. M. Donelson, F. L. Murray & M. S. McCormick

262 Comment. A rebuttal to the claim natural beaches confer fitness benefits on their visitors
M. M. P. F. Soutiers & M. Hamran

266 Invited reply. Natural beaches produce more hatching marine turtle hatchlings than developed beaches, despite regional differences in hatching success
D. A. Pála

Neurobiology

270 The movement of motion-defined contours can explain why cryptic animals are hard to detect
S. Descamps, H. G. Gilchrist, J. Bêty, E. Wapstra & M. Olsson

272 Feeding muscles scale differently from swimming muscles in sunfish (Centrarchidae)
A. M. Cardill, A. M. Antrobus, T. A. Armstrong & J. C. Chappell

274 Costs of reproduction in a long-lived bird: large clutch size is associated with low survival in the presence of a highly virulent disease
S. Descamps, H. G. Gilchrist, J. Bêty, E. Wapstra & M. Olsson

278 Relationships between population size and fecundity in a long-lived bird: large clutch size is associated with low survival in the presence of a highly virulent disease
S. Descamps, H. G. Gilchrist, J. Bêty, E. Wapstra & M. Olsson

282 Relationships between population size and fecundity in a long-lived bird: large clutch size is associated with low survival in the presence of a highly virulent disease
S. Descamps, H. G. Gilchrist, J. Bêty, E. Wapstra & M. Olsson

284 Opinion piece. Marine mammals’ influence on ecosystem processes affecting fisheries in the Barents Sea is trivial
P. J. Conklin

288 Potential impacts of climate change on the winter distribution of Afro-Palaearctic migrant passerines
M. Rüttner-Maeser, E. A. Walther, W. Thuller, C. Rabeh & E. J. Pijper

292 Extreme weather events influence dispersal of naivé northern fur seals

Macrobenthos

294 The movement of motion-defined contours can explain why cryptic animals are hard to detect
S. Descamps, H. G. Gilchrist, J. Bêty, E. Wapstra & M. Olsson

298 Costs of reproduction in a long-lived bird: large clutch size is associated with low survival in the presence of a highly virulent disease
S. Descamps, H. G. Gilchrist, J. Bêty, E. Wapstra & M. Olsson

302 Relationship between population size and fecundity in a long-lived bird: large clutch size is associated with low survival in the presence of a highly virulent disease
S. Descamps, H. G. Gilchrist, J. Bêty, E. Wapstra & M. Olsson

306 Genetic compatibility and hatching success in the sea lamprey (Pisces macrourus)
A. R. Rodríguez-Muñoz & T. Tregenza

310 Biodiversity research sets sail: showcasing the diversity of marine life
T. J. Voss

312 Animal behaviour

318 Interactions between background
C. C. Ioannou & J. Krause

321 Measuring effects on sparrow phenotype and motion during visual detection can explain why cryptic animals are hard to
C. C. Ioannou & J. Krause

324 Free amino acids as phagostimulants in cricket nuptial gifts: support for the ‘CANDY’ hypothesis
S. Warneke, B. Vahle, D. Raubenheimer & S. J. Simpson

327 The impact of host aggressiveness on sex allocation by the gregarious parasitic wasp Crinum plumbeum (L.)
S. Tanaka
