Meeting report
289 New frontiers in biologging science
C. Ruiz & C. C. Hays
Animal behaviour
293 Design complexity in termite-fishing tools of chimpanzees
(Pan troglodytes)
E. Tung, J. Call & D. Morgan
297 The beluga whale produces two pulses to form its sonar signal
M. G. Lambers & M. Madsen
302 Stopover decision during migration: physiological conditions predict nocturnal restlessness in wild passerines
L. Fusi, M. Cardinale, C. Carere & W. Grimm

306 Behavioural phase polyphenism in the Australian plague locust (Chortoicetes terminifera)
310 Bumblebees learn the value of social cues through experience
E. Leadbeater & B. Chittka
313 Social structure influences extra-pair paternity in socially monogamous passerines
E. Leadbeater & B. Chittka

317 Opinion piece. Raising the sauropod
J.-P. Lin

319 Conservation biology
320 Reduced heterozygosity impairs sperm quality in endangered mammals
J. L. Epstein & J. P. Evans
324 Geographically extensive hybridization rapidly reduces fitness (Chironomus piger: Pteropodidae) are remarkably constrained
J. D. L. Smith & T. R. Gregory

327 Evolutionary biology
328 Hybridization of oak species’ vessels and veins within the leaves of oak species’
M. O. Lammers & M. Castellote
330 The genome sizes of megabats (Chiroptera: Pteropodidae) are remarkably constrained
A. Cohas & D. Allainé
332 Opinion piece. On the problems of a closed marriage: celebrating Darwin 200
R. Farrell
334 Comment. Free radicals run in lizard families: a mitochondrial uncoupling phenomenon or not?
F. Cruywesen & F. J. Clissold
335 Invited reply. Free radicals run in lizard families without (and perhaps with) mitochondrial uncoupling
M. Olson, M. Wilson, T. Uher & C. Hallison

338 Population ecology
341 A tiger cannot change its stripes: using a three-dimensional model to match images of living tigers and tiger skins
L. Hilly, P. Lovell, N. Patel, N. S. Kumar, A. M. Cogalasanary & K. U. Karanth

347 Opinion piece. Why do species vary in their rate of molecular evolution?
J. E. Mark & H. Elenyon
349 Population genetics
352 The scaling of green space coverage in European cities
C. A. Price & B. J. Enquist
356 Reduced abundance of insects and spiders linked to radiation at Chernobyl 20 years after the accident
A. P. Møller & T. A. Möller

358 Neurobiology
359 Tiger moths and the threat of bats: decision-making based on the activity of a single sensory neuron

362 Palaeontology
364 Stable isotopes document the trophic structure of a deep-sea cephalopod assemblage including giant octopus and giant squid
Y. Chen, V. Akesson, J. Tyte & P. Richard

366 Landscape modelling spatial bottlenecks: implications for raccoon rabies disease spread

368 Physiology
371 Stem sarcopterygians have primitive polyphalanic fin articulation
S. Y. W. Ho, J. H. C. Zhou, H. H. Li, Y. F. Tan & J.-P. Lin
374 Function and hydrostatics in the structure of a deep-sea cephalopod assemblage including giant octopus and giant squid
Y. Chen, V. Akesson, J. Tyte & P. Richard

377 Evolutionary biology
379 Stable isotopes document the trophic structure of a deep-sea cephalopod assemblage including giant octopus and giant squid
Y. Chen, V. Akesson, J. Tyte & P. Richard

381 Opinion piece. An examination of the bacterial world
T. J. G. Ettema & S. G. E. Andersson
383 A tiger cannot change its stripes: using a three-dimensional model to match images of living tigers and tiger skins
L. Hilly, P. Lovell, N. Patel, N. S. Kumar, A. M. Cogalasanary & K. U. Karanth

389 Global change biology
391 The genome sizes of megabats (Chiroptera: Pteropodidae) are remarkably constrained
A. Cohas & D. Allainé
394 Upper-limit mutation rate estimation for a plant RNA virus
R. Sanjuán, P. Aguadó-Romero & S. F. Elena
397 Modelling mitochondrial size polymorphisms to infer the number of segregating units and mutation rates
M. D. Reed, M. D. Woodward & A. D. Kidd
401 Opinion piece. Why do species vary in their rate of molecular evolution?
L. Bromham
405 Evolutionary rate variation in Old World monkeys
N. Energi, L. Lei, Z. Peng, Y.-H. E. Loh & S. V. Yi
409 Opinion piece. Are sex-biased genes more dispensable?
J. E. Mark & H. Elenyon
413 Mitochondrial genomes: metabolic rate, longevity and the rate of molecular evolution
N. Casset, B. J. Wilson, B. Nabbula, S. Gilmer & E. F. Elmer
417 Opinion piece. Effective population size and the rate and pattern of morphological substitutions
M. Woolfit
421 Opinion piece. Effective population size and the rate and pattern of morphological substitutions
M. Woolfit
425 Opinion piece. Effective population size and the rate and pattern of morphological substitutions
M. Woolfit
429 The g proteobacteria: the Darwin finches of the bacterial world
T. J. G. Ettema & S. G. E. Andersson
