Meeting report

289 New frontiers in biologging science
C. Rizzi & C. C. Heyns

Animal behaviour

291 Design complexity in termite-fishing tools of chimpanzees
(Pan troglodytes)
S. T. Jane, J. Call & B. Morgan

297 The beluga whale produces two pulses to form its sonar signal
M. G. Lambers & M. Castelein

302 Stopover decision during migration: physiological conditions predict nocturnal restlessness in wild passerines
L. Fusani, M. Cardinali, C. Carere & W. Cronmann

306 Behavioural phase polyphenism in the Australian plague locust (Chortoicetes terminifera)

310 Bumble-bees learn the value of social cues through experience
L. Leadbetter & J. Chittka

313 Social structure influences extra-pair paternity in socially monogamous mammals
A. Coffin & D. Aldain

Biomechanics

317 Opinion piece. Raising the sauropod biomechanics
O. W. Goode & P. Bressan & G. Zucchi

320 Reduced heterozygosity impairs sperm quality in endangered passerines

324 Geographically extensive hybridization rapidly reduces fitness
T. D. L. Smith & T. R. Gregory

328 Human kin recognition is self-referential rather than family-referential
A. Bynoe & C. G. Zucki

330 Introductory comment. Raising the sauropod biomechanics
O. W. Goode & P. Bressan & G. Zucchi

336 Human kin recognition is self-referential rather than family-referential
A. Bynoe & C. G. Zucki

339 Trade-off between age of first reproduction and survival in a female primate
G. E. Biemans

343 Comment. Free radicals run in lizard families: a mitochondrial uncoupling phenomenon or not?
F. Circueto & F. Boulard

345 Invited reply. Free radicals run in lizard families without (and perhaps with) mitochondrial uncoupling
M. Olson, M. Wilson, T. Uher & C. halazon

Genealogy

347 The genome sizes of megabats (Chiroptera: Pteropodidae) are remarkably constrained
J. D. L. Smith & T. R. Gregory

Global change biology

352 The scaling of green space coverage in European cities
R. A. Fuller & K. J. Gaston

356 Reduced abundance of insects and spiders linked to radiation at ChernoBYL-20 years after the accident
A. P. Møller & T. Å. Madsen

Marine biology

360 Ochsen’s razor gone blunt: coenzyme Q adaptation and redox balance in tropical reef fishes
M. Gagnon, W. C. Dunlop, R. de Nys & M. Depczynski

364 Stable isotopes document the trophic structure of a deep-sea cephalopod assemblage including giant octopus and giant squid
Y. Chen, V. Molts, J. Tpke & P. richard

Neurobiology

368 Tiger moths and the threat of bats: decision-making based on the activity of a single sensory neuron

Palaeontology

372 Stern sauropterygians have primitive fullfin articulation

376 Function and hydrostatics in the telson of the Burgess Shale arthropod Burgess
J.-P. Lin

Physiology

380 Comment. Comment on Coomes et al. ‘scaling of xylem vessels and veins within the leaves of oak species’
C. A. Price & B. J. Typaldos

381 Invited reply. Response to comment on Coomes et al. ‘scaling of xylem vessels and veins within the leaves of oak species’
D. A. Coomes & L. Sack

Population ecology

385 A tiger cannot change its stripes: using a three-dimensional model to match images of living tigers and tiger skins
L. Hofbauer, P. Lovell, N. Patel, N. S. Kumar, A. M. Copeland & R. U. Karanth

Population genetics

387 Landscape modelling spatial bottlenecks: implications for raccoon rabies disease spread

Special feature

Whole organism perspectives on understanding molecular evolution
Guest edited by Lindell Bromham

391 Introduction. Putting the ‘bo’ into bioinformatics
L. Bromham

394 Upper-limit mutation rate estimation for a plant RNA virus
S. Sanjuan, P. Agudo-Romero & S. F. Elena

397 Modelling mitochondrial site polymorphisms to infer the number of segregating units and mutation rate
M. D. Rendy, M. D. Woodward & A. Doid

Opinion piece. Why do species vary in their rate of molecular evolution?
L. Bromham

405 Evolutionary rate variation in Old World monkeys
N. Dinges, J. Lee, Z. Peng, Y.-H. E. Loh & S. Y. V.

409 Opinion piece. Are sex-biased genes more dispensable?
J. E. Marks & H. Eigen

413 Mitochondrial genomes: metabolic rate, longevity and the rate of molecular evolution
N. Calistio, B. R. Wilson, B. Nabholz, S. Gilmer & P. U. Eiler

417 Opinion piece. Effective population size and the rate and pattern of molecular substitution
M. Woolfit

421 Opinion piece. An examination of phylogenetic models of substitution rate variation among lineages
L. Y. V.

425 Inferring evolutionarily significant units of bacterial diversity from broad environmental surveys of single-taxa
T. G. Barraclough, M. Hughes, N. Ashford-Hodges & J. T. Yatsun

429 The g-proteobacteria: the Darwin finch of the bacterial world
T. J. G. Ettema & S. G. E. Andersson

Registered Charity No 207043

rsbl.royalsocietypublishing.org

Biol. Lett. vol 5  no 3  pp. 289–432 23 June 2009

23 June 2009

volume 5
number 3
pages 289–432
