Meeting report

289 New frontiers in biologging science
C. Ruiz & C. C. Hoy

Animal behaviour

293 Design complexity in termite-fishing tools of chimpanzees (Pan troglodytes)
T. Tanj, J. Call & D. Morgan

296 The beluga whale produces two pulses to form its sonar signal
M. O. Lammers & M. Castellote

302 Stopover decision during migration: physiological conditions predict nocturnal restlessness in wild passerines
L. Funari, M. Cardinals, C. Carere & W. Grimm

309 Behavioural phase polyphenism in Japanese walnut (Juglans regia)

310 Bumble-bees learn the value of social cues through experience
T. Leadbeater & L. Chittka

313 Social structure influences extra-pair paternity in socially monogamous mammals
A. Cohas & D. Allainé

Biomechanics

317 Opinion piece. Raising the sauropod backbone: the biological imperative
J. R. Pannell

320 Reduced heterozygosity impairs hybridization rapidly reduces fitness
M. Olson, M. Wilson, T. Uller & C. ballison

324 Invited reply. Free radicals run in lizard families: a mitochondrial uncoupling phenomenon or not?
F. Cricuoto & F. Bouillaud

328 Opinion piece. On the problems of a closed marriage: celebrating Darwin 200
T. J. G. Ettema & S. G. E. Andersson

329 Concordance and divergence of a single sensory neuron decision-making based on the activity of a single sensory neuron

330 Function and hydrostatics in the structure of a deep-sea cephalopod

332 Opinion piece: Are sex-biased genes polymorphisms to infer the number of segregating units and mutation rate
N. Elango, J. Lee, Z. Peng, Y.-H. E. Loh & S. V. Y

334 Opinion piece. Free radicals run in lizard families: a mitochondrial uncoupling phenomenon or not?
F. Cricuoto & F. Bouillaud

335 Invited reply. Response to comment on Coomes et al. on Coomes
D. A. Coomes & L. Sack

337 Opinion piece. An examination of the scaling of xylem vessels and veins within the leaves of tropical reef fishes

338 Opinion piece. Why do species vary in their rate of molecular evolution?
J. E. Mank & H. Ellegren

340 Opinion piece. Inferring evolutionarily significant bottlenecks: implications for raccoon rabies disease spread

Population ecology

341 A tiger cannot change its stripes: using a three-dimensional model to match images of living tigers and tiger skins
L. Hilly, P. Lovell, N. Patil, N. S. Kumar, A. M. Copeland & K. U. Karanth

343 Comment. Free radicals run in lizard families: a mitochondrial uncoupling phenomenon or not?
F. Cricuoto & F. Bouillaud

345 Invited reply. Free radicals run in lizard families: a mitochondrial uncoupling phenomenon or not?
F. Cricuoto & F. Bouillaud

352 The scaling of green space coverage in European cities
R. A. Tester & R. J. Causton

356 Reduced abundance of insects and spiders linked to radiation at Chernobyl 20 years after the accident
A. P. Møller & T. A. Mousseau

360 Ockham’s razor gone blunt: coenzyme Q adaptation and redox balance in tropical reef fishes
M. Gagliano, W. C. Dunlap, R. de Nys & M. Depczynski

364 Stable isotopes document the trophic structure of a deep-sea cephalopod assemblage including giant octopod and giant squid
Y. Chen, V. Moloss, J. Typle & P. Richard

366 Tiger moths and the threat of bats: an observational study

368 Tiger moths and the threat of bats: an observational study

372 Stem sarcopterygians have primitive polybasal fin articulation

376 Function and hydrostatics in the structure of a deep-sea cephalopod

381 Opinion piece. Why do species vary in their rate of molecular evolution?
J. E. Mank & H. Ellegren

382 Opinion piece: Are sex-biased genes polymorphisms to infer the number of segregating units and mutation rate
N. Elango, J. Lee, Z. Peng, Y.-H. E. Loh & S. V. Y

384 Opinion piece. Free radicals run in lizard families: a mitochondrial uncoupling phenomenon or not?
F. Cricuoto & F. Bouillaud

386 Opinion piece. Comment on Coomes et al. ‘Sizing of symp could not be provided

387 Opinion piece: Effective population size and the rate and pattern of nucleotide substitutions
M. Woolfit

390 Opinion piece: Are sex-biased genes polymorphisms to infer the number of segregating units and mutation rate
N. Elango, J. Lee, Z. Peng, Y.-H. E. Loh & S. V. Y

394 Upper-limit mutation rate estimation for a plant RNA virus
R. Sanjuan, P. Aguadó-Romero & J. i. Elena

397 Modelling mitochondrial site polymorphisms to infer the number of segregating units and mutation rate
M. D. Randi, M. D. Woodward & A. Doida

399 Opinion piece. Why do species vary in their rate of molecular evolution?
L. Bronson

401 Opinion piece. Free radicals run in lizard families: a mitochondrial uncoupling phenomenon or not?
F. Cricuoto & F. Bouillaud

405 Evolutionary rate variation in Old World monkeys
N. Elango, J. Lee, Z. Peng, Y.-H. E. Loh & S. V. Y

409 Opinion piece. Are sex-biased genes polymorphisms to infer the number of segregating units and mutation rate
N. Elango, J. Lee, Z. Peng, Y.-H. E. Loh & S. V. Y

411 Opinion piece: Effective population size and the rate and pattern of nucleotide substitutions
M. Woolfit

413 Opinion piece: Effective population size and the rate and pattern of nucleotide substitutions
M. Woolfit

417 Opinion piece: Effective population size and the rate and pattern of nucleotide substitutions
M. Woolfit

420 Opinion piece. An examination of phylogenetic models of substitution rate variation among lineages
L. Y. Whidden

422 Inferring evolutionarily significant units of bacterial diversity from broad environmental surveys of single-taxon
D. A. Coomes & L. Sack

423 Opinion piece. Comment on Coomes et al. ‘Sizing of symp could not be provided

425 Inferring evolutionarily significant units of bacterial diversity from broad environmental surveys of single-taxon
T. G. Barraclough, M. Hughes, T. G. Barraclough, M. Hughes, T. G. Barraclough, M. Hughes

427 Opinion piece. Free radicals run in lizard families: a mitochondrial uncoupling phenomenon or not?
F. Cricuoto & F. Bouillaud

429 Opinion piece: Effective population size and the rate and pattern of nucleotide substitutions
M. Woolfit

431 Opinion piece: Effective population size and the rate and pattern of nucleotide substitutions
M. Woolfit

433 Opinion piece. Comment on Coomes et al. ‘Sizing of symp could not be provided

435 Invited reply. Free radicals run in lizard families: a mitochondrial uncoupling phenomenon or not?
F. Cricuoto & F. Bouillaud

437 The genome sizes of megabats (Chiroptera: Pteropodidae) are remarkably constrained
J. D. L. Smith & T. R. Gregory

440 Opinion piece. Why do species vary in their rate of molecular evolution?
J. E. Mank & H. Ellegren

444 Upper-limit mutation rate estimation for a plant RNA virus
R. Sanjuan, P. Aguadó-Romero & J. i. Elena

447 The genome sizes of megabats (Chiroptera: Pteropodidae) are remarkably constrained
J. D. L. Smith & T. R. Gregory

450 Opinion piece. Are sex-biased genes polymorphisms to infer the number of segregating units and mutation rate
N. Elango, J. Lee, Z. Peng, Y.-H. E. Loh & S. V. Y

454 Opinion piece: Effective population size and the rate and pattern of nucleotide substitutions
M. Woolfit

456 Opinion piece: Effective population size and the rate and pattern of nucleotide substitutions
M. Woolfit

459 Opinion piece: Effective population size and the rate and pattern of nucleotide substitutions
M. Woolfit

461 Opinion piece: Effective population size and the rate and pattern of nucleotide substitutions
M. Woolfit
