Meeting report
289 New frontiers in biologging science
C. Ruiz & C. C. Hoy
Animal behaviour
291 Design complexity in termite-fishing tools of chimpanzees (Pan troglodytes)
T. Sanjou, J. Call & D. Morgan
297 The beluga whale produces two pulses to form its sonar signal
M. G. Lambers & M. Casterline
302 Stopover decision during migration: physiological conditions predict nocturnal restlessness in wild passerines
L. Fusiari, M. Cardinals, C. Carere & W. Cosimani
306 Behavioural phase polyphenism in a native trout in the wild
D. A. Coomes & L. Sack
310 Bumble-bees learn the value of social cues through experience
L. Leadbeater & L. Chittka
313 Social structure influences extra-pair paternity in socially monogamous passerines
A. Calfa & B. D. Allard
Biomechanics
317 Opinion piece. Raising the sauropod neck: it costs more to get less higher
B. S. Seymour
Conservation biology
320 Reduced heterozygosity impacts sperm quality in endangered mammals
I. S. Egertson & J. P. Exarhakis
324 Geographically extensive hybridization between the forest trees American butternut and Japanese walnut
S. M. Holtan, T. S. McClain, S. E. Uhrmacher & J. Romanovsky
328 Hybridization rapidly reduces fitness of a native trout in the wild
330 Reduced abundance of insects and spiders linked to radiation at Chernobyl 20 years after the accident
A. P. Melzer & T. A. Moisés
Marine biology
360 Ockham’s razor gone blunt: coenzyme Q adaptation and redox balance in tropical reef fishes
M. Gagliano, W. C. Dunlap, R. de Nys & M. Depczyński
364 Stable isotopes document the trophic structure of a deep-sea cephalopod assemblage including giant octopuses and giant squid
Y. Cherel, V. Moltsch, J. Tytle & P. Richard
Neurobiology
368 Tiger moths and the threat of bats: decision-making based on the activity of a single sensory neuron
Palaeoentomology
372 Stern scarpaeurae have primitive plumiform antennae
J. M. Bateman, D. J. Carr, W. F. Allendorf & B. N. White
Physiology
380 Comment. Comment on Coomes et al. ‘Scaling of xylem vessels and veins within the leaves of oak species’
C. A. Price & B. J. Enquist
381 Invited Reply. Response to comment on Coomes et al. ‘Scaling of xylem vessels and veins within the leaves of oak species’
D. A. Coomes & B. S. Seymour
Population ecology
381 A tiger cannot change its stripes: using a three-dimensional model to match images of living tigers and tiger skins
L. Hagi, P. Lovell, N. Patil, N. S. Kumar, A. M. Copeland & K. U. Karanth
Population genetics
387 Landscape modelling spatial bottlenecks: implications for raccoon rabies disease spread

Special feature
Whole organism perspectives on understanding molecular evolution
Guest edited by Lindell Bromham
391 Introduction. Putting the ‘bio’ into bioinformatics
L. Bromham
394 Upper-limit mutation rate estimation for a plant RNA virus
R. Sanjuán, P. Aguadó-Romero & S. I. Elina
397 Modelling mitochondrial site polymorphisms to infer the number of segregating units and mutation rate
M. D. Rendy, M. D. Woodward & A. Dohle
401 Opinion piece. Why do sex-biased genes vary in their rate of molecular evolution?
L. Bromham
405 Evolutionary rate variation in Old World monkeys
N. Elango, J. Lee, Z. Peng, Y.-H. E. Loh & S. Y. V.
409 Opinion piece. Are sex-biased genes more dispensable?
J. E. Mark & H. Elegren
413 Mitochondrial alleles: metabolic rate, longevity and the rate of molecular evolution
N. Galtier, R. W. Jobson, B. Nabholz, S. Glémin & P. U. Blier
417 Opinion piece. Effective population size and the rate and pattern of molecular substitutions
M. Woolfit
421 Opinion piece. An examination of phylogenetic models of substitution rate variation among lineages
L. Y. W.
425 Inferring evolutionarily significant units of bacterial diversity from broad environmental surveys of single-taxon
T. C. Barracklough, M. Hughes, H. F. Hugenholtz & T. J. Stacke
429 The g-proteobacteria: the Darwin finches of the bacterial world
T. J. Ettama & S. G. E. Andersson
