Meeting report

289 New frontiers in biologging science
C. Ruiz & C. C. Heyns

Animal behaviour

291 Design complexity in termite-fishing tools of chimpanzees (Pan troglodytes)
L. M. S. Strobe & G. C. Zucchi

295 Stopover decision during migration: physiological conditions predict nocturnal restlessness in wild passerines
L. Fusi, M. Cardinale, C. Carere & W. Grimm

297 Behavioural phase polyphenism in the Australian plague locust (Chortoicetes terminifera)
L. J. Gray, O. A. Sword, M. L. Anstey, G. A. Sword & R. R. Hoy

300 Reduced abundance of insects and spiders linked to radiation at Chernobyl 20 years after the accident
A. J. M. Loader & T. A. Mousseau

302 Behavioural phase polyphenism in the Australian plague locust (Chortoicetes terminifera)
L. J. Gray, O. A. Sword, M. L. Anstey, G. A. Sword & R. R. Hoy

303 Biomechanics

137 Opinion piece. Raising the sauropod neck: it costs more to get less
R. S. Seymour

Conservation biology

309 Reduced heterozygosity impairs sperm quality in endangered mammals
R. F. Leary & F. W. Allendorf

313 Social structure influences extra-pair paternity in socially monogamous bumble-bees
S. M. Hoban, T. S. McCleary, S. E. Schlarbaum & J. Romero-Severson

317 Opinion piece. Raising the sauropod neck: it costs more to get less
R. S. Seymour

320 Reduced heterozygosity impairs sperm quality in endangered mammals
R. F. Leary & F. W. Allendorf

324 Geographically extensive hybridization between the forest trees American butternut and Japanese walnut
S. M. Holtan, T. S. McClain, S. E. Liston & R. R. Hoy

327 Evolutionary biology

132 Opinion piece. On the problems of a closed marriage: celebrating Darwin 200
R. Pye

330 Human kin recognition is self-rather than family-referential
A. Bryden & C. Zucchi

332 Evolutionary biology

132 Opinion piece. On the problems of a closed marriage: celebrating Darwin 200
R. Pye

336 Human kin recognition is self-rather than family-referential
A. Bryden & C. Zucchi

339 Trade-off between age of first reproduction and survival in a female primate
G. E. Bremong

343 Comment. Free radicals run in lizard families: a mitochondrial uncoupling phenomenon or not?
F. Cincotta & F. Boulard

345 Invited reply. Free radicals run in lizard families without (and perhaps with) mitochondrial uncoupling
M. Olson, M. Wilson, T. Ulbr & C. Balian

Genome biology

347 The genome sizes of megabats (Chiroptera: Pteropodidae) are remarkably constrained
J. D. Smith & T. R. Gregory

Global change biology

352 The scaling of green space coverage in European cities
R. A. Fuller & K. J. Gaston

356 Reduced abundance of insects and spiders linked to radiation at Chernobyl 20 years after the accident
A. J. M. Loader & T. A. Mousseau

358 Function and hydrostatics in the polybasal fin articulation of a single sensory neuron
M. Zhu & X. Yu

364 Marine biology

368 Tiger moths and the threat of bats: the evolutionary conflict and its potential resolution
J. E. Mank & H. Ellegren

372 Stem sarcopterygians have primitive polypod fin articulation
N. Ashford-Hodges & T. Fujisawa

376 Stable isotopes document the trophic structure of a deep-sea cephalopod assemblage including giant octopus and giant squid
Y. Cherel, V. Atkinson, J. Tytle & P. Richard

Neurobiology

378 Tiger moths and the threat of bats: the evolutionary conflict and its potential resolution
J. E. Mank & H. Ellegren

384 Landscape modelling spatial bottlenecks: implications for raccoon rabies disease spread

Population ecology

381 A tiger cannot change its stripes: using a three-dimensional model to match images of living tigers and tiger skins
L. Hilby, P. Lovell, N. Pask, N. S. Kumar, A. M. Copeland & R. K. Karanth

383 A tiger cannot change its stripes: using a three-dimensional model to match images of living tigers and tiger skins
L. Hilby, P. Lovell, N. Pask, N. S. Kumar, A. M. Copeland & R. K. Karanth

Population genetics

387 Landscape modelling spatial bottlenecks: implications for raccoon rabies disease spread

Special feature

Whole organism perspectives on understanding molecular evolution
Guest edited by Lindell Bromham

391 Introduction. Putting the ‘bio’ into bioinformatics
L. Bromham

394 Upper-limit mutation rate estimation for a plant RNA virus
R. Sanjuán, P. Aguado-Romero & S. F. Elena

397 Modelling mitochondrial site polymorphisms to infer the number of segregating units and mutation rate
M. D. Riedy, M. D. Woodhams & A. Doidge

401 Opinion piece. Why do species vary in their rate of molecular evolution?
L. Bromham

405 Evolutionary rate variation in Old World monkeys
N. Elango, J. Lee, Z. Peng, Y.-H. E. Loh & S. V. V.

409 Opinion piece. Are sex-biased genes more dispensable?
J. E. Mark & H. Eizirik

413 Mitochondrial uoles: metabolic rate, longevity and the rate of molecular evolution

417 Opinion piece. Effective population size and the rate and pattern of nucleotide substitutions
M. Woodhams

421 Opinion piece. An examination of phylogenetic models of substitution rate variation among lineages
L. W. H.

425 Inferring evolutionarily significant units of bacterial diversity from broad environmental surveys of single-taxon assemblages
T. G. Barragán, M. Hughes, N. Ashford-Hodges & T. Yatskar

429 The p-glycoproteins: the Darwin finale of the bacterial world
T. J. G. Ettema & S. G. E. Andersson
