Meeting report
431 Animal migration: linking models and data beyond taxonomic limits

Animal behaviour
439 Stress and the costs of extra-territorial movement in a social carnivore
A. J. Young & S. L. Monfort
442 Hypersonic jets as a strategy to survive impalement in a salt-marsh inhabiting spider
A. Hörder, W. Montagna & D. Renaille
444 Adaptive social immunity in the obligatory ant-farming termite
A. Cini, L. Gioli & R. Cervo

Biomechanics
466 Morphology, performance, fitness: functional insight into a post-Pleistocene radiation of monpsyliothids
R. K. Lamberti

Community ecology
492 Opinion piece. Missing the rent: is the positive inter-specific abundance-distribution relationship a truly general macroecological pattern?
A. Kommer, J. Pinheiro & J. S. kotiaho

Conservation biology
495 Large population sizes mitigate negative effects of variable weather conditions on fruit set in two spring woodland orchids
M. Jacobson, R. Bay & D. Hodges

Evolutionary biology
503 Opinion piece. Darwin would have loved DNA, criticizing Darwin 200
L. Bornat
506 Does a predatory insect contribute to the divergence between cave- and surface-adapted fish populations?
M. Taboas
510 Gliding hexapods and the origins of insect aerial behaviour
S. P. Taroni, M. Kaspert & R. Duddy
513 Positive Darwinian selection results in resistance to cardioactive toxins in true mantids
517 Body size differences do not arise from differential mate preferences in a species pair of threespine stickleback
M. L. Hoyle, E. A. Pritchett & W. Boag
521 Evolution of seahorses’ upright posture was linked to Oligocene expansion of seagrass habitats
P. B. Toulson & R. E. Beheregaray

Evolutionary developmental biology
524 Humans at tropical latitudes produce more females
K. J. Navara
528 Skin of the Cretaceous mosasaur Plotosaurus: implications for aquatic adaptations in giant marine reptiles

Global change biology
532 Global changes and animal phenotypic responses: relation-based phenology, redness of sunsets linked with temperature and rainfall during the last century
P. Galassi, D. Ribolzi, R. Sacchi & M. Toselli

Neurobiology
534 Dynamic neuromodulation of aggression by vasotocin: influence of social context and social phenotype in territorial songbirds
J. L. Coadie, G. Kabelik & S. E. Shruck

Palaeontology
537 Postcranial skeletal pneumatization and the extinct echinate plesiosaur
J. E. Ballantyne, P. M. Barrett & D. J. Gower

Psychology
561 Comment. Coincidence or evidence: the sabretooth cat Smilodon social?
C. H. Miller
563 Invited reply. Sociality in Rancho La Brea: Platon’s arguments favor ‘evidence’ over ‘coincidence’
F. Van Valenbrok, T. Mathias, P. J. Erasmus, M. G. L. Mills, G. F. Grether & C. Carbone

Ecology
573 Rainfall-induced temporary bearing loss in dolphins
T. F. Benstead & A. M. Elliott
577 Effects of floral thermoperiods on pollinator function in Asian flax and cabbage (Brassicaceae omelians)
R. S. Seymour, T. Bu, Y. Oda & K. Ro

Population genetics
578 Plant height–crown radius and canopy architecture in Vaccinium sp. and their effects on the positive interspecific abundance-distribution relationship

Biomechanics
488 Morphology, performance, fitness: functional insight into a post-Pleistocene radiation of monopsyliothids
R. K. Lamberti

Community ecology
492 Opinion piece. Missing the rent: is the positive inter-specific abundance-distribution relationship a truly general macroecological pattern?
A. Kommer, J. Pinheiro & J. S. Kotiaho

Conservation biology
495 Large population sizes mitigate negative effects of variable weather conditions on fruit set in two spring woodland orchids
M. Jacobson, R. Bay & D. Hodges

Evolutionary biology
503 Opinion piece. Darwin would have loved DNA, criticizing Darwin 200
