433 Animal migration: linking models and data beyond taxonomic limits
434 58 years beyond Darwin’s Origin of species: linking new approaches to reconstruct early animal phylogeny
A. J. Young & L. L. Mocettini

Animal behaviour
435 Stress and the costs of extra-territorial movement in a social carnivore
A. E. Fry & S. L. Mocettini

436 Hypoctic colour as a strategy to survive predation in a salt-marsh inhabiting spider
C. V. Wilkes & W. O. M. Hughes

Field crickets change mating preferences using remembered social information
N. W. Bailey & M. Zal

437 Pre-natal stress amplifies the immediate behavioral responses to acute pain in insects

438 Kee (Motor notability): consider spatial relationships between objects in the support problem
A. M. DeIaquis, G. K. Gajda & L. Huter

439 A quantitative threshold for nest-mate recognition in a paper social wasp
A. O. Li, S. Lutz & S. A. Corso

Social structure of primate interaction networks facilitates the emergence of cooperation
S. Z. Wilkin, C. Kapfer & M. J. Nelson

440 Male-male agonistic behaviour in the obligate upstream migration of amphibious passerine Tarsiger cyanurus
Y. Kato

441 Nest, not colour, may be inures to their death
K. F. Borel & A. M. Elder

442 Where do penguins go during the non-breeding season?
J. L. Macleay, J. A. Strother & P. N. Trathan

443 150 years beyond Darwin’s Origin of species: linking new approaches to reconstruct early animal phylogeny

Biomechanics
444 Morphology, performance, fitness: functional insight into a post-Pleistocene radiation of mosquitofish
R. B. Langerhan

Community ecology
445 Opinion piece. Missing the rarest: is this the positive interspecific abundance–distribution relationship a truly general macroecological pattern?
A. Kromer, J. Palenik & J. S. Kottke

Conservation biology
446 Large population sizes mitigate negative effects of variable weather conditions on fruit set in two spring woodland orchids
M. Jackson, B. Boy & D. Hanger

447 Quantitative analysis of the effects of the exotic Argentine ant on seed-dispersal mutualisms
M. A. Rodriguez-Cabal, R. L. Stohle, M. A. Nutrizi & N. J. Sanders

Evolutionary biology
503 Opinion piece. Darwin would have loved DNA: celebrating Darwin 200
L. Brottem

504 Does a predatory insect contribute to the divergence between cave- and surface-adapted fish populations?
M. Taborsky

505 Gliding hexapods and the origins of insect aerial behaviour
S. P. Yuan, A. Kapiolani & R. Dudley

506 Positive Darwinian selection results in resemblance to cardioactive toxins in true ants
D. J. Muir, D. C. F. Holland, M. D. Rossell, A. Robinson & J. S. King

517 Body size differences do not arise from free-living mate preferences in a species pair of threespine stickleback
M. L. Hovel, E. A. Price & J. W. Boughman

521 Evolution of seahorses’ upright posture was linked to Oligocene expansion of seagrass habitats
P. F. Tice & A. R. Blessington

522 Evolutionary developmental biology
454 Humans at tropical latitudes produce more female kids
K. V. Naraya

528 Skin of the Cretaceous mosasaur Plotosaurus: Implications for aquatic adaptations in giant marine reptiles
J. Strickland, C. Abbott, M. W. Caldwell & A. M. Field

Global change biology
532 Global changes and animal phenotypic responses: relation-based phenology of redness of scops owls increased with temperature and rainfall during the last century
P. Galetti, D. Rubolini, R. Sacchi & M. Fabri

533 Methane emission by plant communities in an alpine meadow on the Qinghai-Tibetan Plateau: a new experimental study of alpine meadows and nut pasture
Z. Zhang, A. Xu, S. Chen, Z. Chen & J. Shan

539 Climate change effects on migration phenology may mismatch brood parasitism and their hosts
N. Sanz, D. Rubolini, E. Leitkomen, L. V. Solisti, A. Renouf-Kaquit, R. Ambrosini, C. Bonaccorso & A. P. Moller

542 Climate change and visual size dimorphism in an Arctic spider
T. Taira, J. L. Hammer, T. Fach & N. Toft

Marine biology
543 Foraging segregation between two closely related shrewmaws breeding in sympatry

544 Effects of food on bacterial community composition associated with the copepod Acartia tonsa Dana
R. Tanig, C. Olt recovering, M. H. Koch & P. F. Grasvent

Neurobiology
554 Dynamic neuromodulation of aggression by vasotocin: influence of social context and social phenotype in territorial songbirds
J. L. Goodson, D. Kabelik & S. E. Schrock

Paleontology
557 Postcranial skeletal pneumatization and the unusual theropod Smilodon
R. J. Butler, P. M. Barrett & D. J. Gower

561 Comment. Coincidence or evidence: ‘evidence’ over ‘coincidence’
E. Van Valkenborg, T. Madsen, P. J. Furnison, M. D. L. Mills, C. T. Creble & C. Barlowe

Physiology
565 Social-induced temporary hearing loss in dolphins
K. D. Boldt & A. M. Elder

569 Effects of floral thermogenesis on pollinators in Asian shrub cabbageworm Pieris rapae
K. P. Kupczok, A. T. Nakagawa & S. Vlasov

Population ecology
571 Plant height–genotype interactions determine above-ground biomass–density relationship in stressful environments
X. Dai, X. Lu, G. Zhang, T. Bai, J. Zhang, Y. Wang & B. Yan

574 Community and susceptibility to infectious diseases in humans
