Meeting report 150 years beyond Darwin’s Origin of Species: finding new approaches to reconstruct early animal phylogeny R. Loxley

Animal behaviour 459 Stress and the costs of extra-territorial movement in a social wasp A. J. Robinson & J. S. Keogh

Behavioural ecology 428 Large population sizes mitigate negative effects of variable weather conditions on fruit set in two spring woodland orchids H. Jacobson, R. Boy & D. Horne

Biomechanics 488 Morphology, performance, fitness: functional insight into a post-Pleistocene radiation of mosquitofish R. B. Langham

Biogeography 499 Quantitative analysis of the effects of the exotic Argentine ant on seed-dispersal mutualisms M. A. Rodriguez-Cabal, K. L. Stuble, M. A. Nutari & N. J. Sanders

Biological control 506 Does a predatory insect contribute to the divergence between cave- and surface-adapted fish populations? M. Tobler

Biological engineering 532 Global changes and animal phenotypic plasticity L. Huber

Biological oceanography 539 Climate change effects on migration phenology may mismatch iridoid parasitic cuckoo and their hosts N. Sanu, D. Rikbé, E. Lethias, L. V. Sellóka, A. Rendell-Aquadi, R. Ambrosini, C. Bonsorci & A. F. Müller

Biological oceanography 541 Climate change and ocean size dimorphism in an Arctic spider T. T. Nars, J. L. Hammett, Y. Tailby & S. Toft

Biological oceanography 571 Plant height–crown radius and canopy structure of tropical dry forest trees S. P. Yanoviak, M. Kaspari & R. Dudley

Biological oceanography 575 Response of tropical dry forest trees to rainfall during the wet season: evidence for ‘coincidence’ over ‘correlation’ J. M. Igual, J. Bécares & K. A. Hobson

Biological oceanography 604 Climate change and sexual size dimorphism in an Arctic spider T. T. Nars, J. L. Hammett, Y. Tailby & S. Toft

Biological oceanography 612 Effects of food on bacterial community composition associated with the cepsided Acrolopus tenuis Dana K. Tanig, C. Oliveira, R. Helgason-Schmieder & P. F. Grossart

Biological oceanography 617 Evolution of seahorses’ upright posture L. Huber

Biological oceanography 632 Quantitative analysis of the effects of the exotic Argentine ant on seed-dispersal mutualisms M. A. Rodriguez-Cabal, K. L. Stuble, M. A. Nutari & N. J. Sanders

Biological oceanography 639 Is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, dedicated to promoting excellence in science Founded in 1660, the Royal Society is the independent scientific academy and the UK, ded...
