23 December 2009

volume 5 • number 6 • pages 721–864

Meeting report
721 Male–parasite interactions: recent or tolerable but never stop running
S. W. Evans

725 The brain can predict its environment: does the brain predict climate change?

726 Ecology, evolution and genetics join together on Canada’s east coast
B. M. Starzomski & C. D. Brown

Animal behaviour
729 Opinion piece. Kleptothorax: an additional category of thermostatics, and a possible example in sea bristles (Calicolea luteolata, Semperidae)
T. Marvin, T. J. Rothe & R. V. Sherr

731 Positive allometry in the motion performance: female praying mantises outperform males in flight
S. S. Nava, M. Conway & E. P. Martins

733 Solar activity affects avian timing of reproduction
M. E. Vázquez & J. Sauri

734 Monkey and human exhibit similar motion-processing mechanisms
M. Guo & L. Li

736 Ants, song and neural circuits in species-specific song
S. A. MacDougall-Shackleton, L. Dinska, A. M. Staviski, D. A. Tricks, K. A. Stewart & F. A. MacDougall-Shackleton

737 Evidence of an evolutionary precursor to human language affiliation in a non-human primate
A. D. Diedrich, D. Daleh, S. Black, J. National & M. D. Heyes

739 Allatoneurons are non-soiled based on non-soiled arousals
L. T.篠谷, A. S. 岩沼, N. 岩倉 & A. 小松

751 Aggressive use of Savaiian mimicry by an anti-pleasing spider
T. N. Lion & R. J. Jackson

758 Testudinoides is associated with harem maintenance ability in free-ranging grey-headed flying-foxes, Pteropus poliocephalus
S. M. Kline, J. A. Willgoss & E. K. V. Falcão

762 Probing aggressive motivation in a cichlid fish
S. Bowker, M. E. Williams, J. J. Astbury & K. J. Heard

764 Predatory motor activation during action observation in human infants
V. V. Scataglia, M. R. Johnson, T. Olbricht & G. C. Colins

Community ecology
773 Herbaceous release through cascading risk effects
M. H. Schmidt-Erlich & E. Steingerhuber

777 Does the beta diversity of arctic plants show a significant extinction or a significant diversity? A thought experiment on the stability and resilience of arctic ecosystems
M. H. Schmidt-Erlich & E. Steingerhuber

779 Invited reply. On the obvious positive interspecific relationships between abundance and distribution: a reply to Blackburn and Gaston
J. S. Katohno, A. Komornik & J. P. Katten

Evolutionary biology
781 Rapid radiation of immune diversity leads to pathogen evolution in adult female lizards
S. A. MacDougall-Shackleton & R. A. Shaw

784 Mhc polymorphism fails to explain the heritability of phyllostachycoid–induced skin swelling in a wild passerine
B. R. Beattie, J. S. Shreeve, M. Richard, O. Chaitel & O. Seng

788 Should I stay or should I go? The evolution of sexual selection against deleterious mtDNA deletions
B. R. Beattie, T. W. Egan, J. S. Byrnes & M. P. Scott

792 Female presence influences sperm velocity in the guppy
C. Casamayor, A. V. Firth & A. Pizzari

795 Sexual selection against deleterious mutations via variable male search success
R. Maclean, M. C. Whitlock & D. R. Rand

798 A distinct selective cost associated with X chromosome activity: trans-generational priming of antibacterial immunity in borst-boss bees
M. Sattal & P. S. Kromp-Hempel

802 The evolution of growth rates on an expanding range edge
B. L. Phillips

805 Environmentally induced responses along the FAD3A1-FAD2B2 gene
D. T. Doherty, P. S. Kromp-Hempel & K. D. Rand

809 Bitter taste perception in Neanderthals through the analysis of the TAS2R3 gene

812 Divergence times of the two regional medusa populations in Japan as a new time scale for comparative genomics of vertebrates

Volume title page and table of contents

Evolutionary developmental biology
817 Life history, sexual dimorphism and ‘ornamental’ feathers in the mesozoic bird Confuciusornis sanctus
W. S. Peters & D. S. Peters

Global change biology
821 ‘Tales of Symphysis’: extinction dynamics in response to past climate change in Madagascar rainforests
J. B. Saiz-Jimenez, M. E. Bonell & K. J. Willis

826 Climate change is the dark sky sheep
S. M. Okamoto, A. Fuller & D. Mitchell

Marine biology
830 Whisker isotopic signature depicts migration patterns and multi-year intra- and inter-individual foraging strategies in fur seals
J. A. Dunlop, M. J. C.Richard, P. Richard & C. Garain

Palaeontology
833 Mosaic skulls and genes reveal long-term conservation of New Caledonian mammals
M. S. Lee, C. N. M. Hutchinson, T. H. Wood, M. Andrieux, A. D. T. Evans & J. P. Nédélec

839 Archaeology remains in the oral cavities of fossil apes support inference of early immunochemistry

841 High-fidelity X-ray micro-tomography reconstruction of osteodermed-hosted Carboniferous arachnids
R. Gasparini, A. V. Firth & S. M. Eppley

Pathogen biology
845 Crowded locusts produce hatchlings vulnerable to fungal attack
A. G. Kellie, J. R. Piel & S. J. Sampson

Phylogeny
849 Fossil and the determination of ancestry from cranial measurements
M. Ebbin & M. Cullum

Physiology
853 Strategic (adaptive) hyperventilation in bull dromedary camels during rut: could it increase reproductive success?
G. G. Sebban, B. Durand, J. Haeusler, C. Cometti, A. Crippa & S. Blumberg

857 Long-lived sperm in the geothermal bryozoan Favia rustica
T. M. Blackburn & K. J. Gaston

Population genetics
861 Opinion piece. Adaptation as organism design
A. Gardner
