33 Comment. Exposure to sonic survey alters blue whale acoustic communication

334 Within-wingbeat damping: dynamics of animal movement in an uneven terrain

330 vultures: a new threat from ketoprofen

336 Deep-ocean origin of the freshwater eels

339 Toxicity of non-steroidal anti-inflammatory drugs to the sub-Antarctic wingless fly

346 Ageing and thermal performance in the neotropical moth

342 Introduction. A moving topic: control and dynamics of animal movement

354 Plausibility of inferred ancestral phenotypes and the evaluation of alternative models of limb evolution in scincid lizards

363 Deep-ocean origin of the freshwater volopterygidae: older is better

368 Temporal learning of predation risk by embryonic amphibians

370 Evolution of ultraviolet vision in the sub-Antarctic wingless fly Anatalanta

375 Young children with autism spectrum

382 Improved viability of populations with diverse life-history portfolios

387 Introduction. A moving topic: control and dynamics of animal movement

394 Vortex interactions with flapping wings and fins can be unpredictable

399 Behavioural asymmetry affects escape performance in a teleost fish

402 Organization and physiology of posterior lateral line afferent neurons in larval zebrafish

408 Evolutionary biology

414 Behavioural asymmetry affects escape performance in a teleost fish

419 Plausibility of inferred ancestral phenotypes and the evaluation of alternative models of limb evolution in scincid lizards

422 Within-wingbeat damping: dynamics of animal movement in an uneven terrain

426 Dynamics of animal movement in an ecological context: draggng wing damage reduces flight performance and predation success

430 Sexual conflict and sex allocation
