620 Costs and benefits of multi-male
617 Taste-rejection behaviour by predators
614 Social learning in a non-social reptile
604 Breaking the trade-off: rainforest bats
600 Evidence for distributed light
589 Persistence of song types in Darwin’s
585 Males of the orb-web spider
Animal behaviour

Meeting reports

575 Lost in space? Searching for directions in the spatial modelling of individuals, populations and species ranges
L. Rössler, R. A. Johnstone, B. M. Siemers

579 Comparative analysis of marine ecosystems: workshops on predator–prey interactions
K. M. Babcock, C. A. MacNeil, J. Matley, G. M. Brierley

585 Males of the orb-web spider Argiope aurantia sacrifice themselves to
K. W. Wilke & J. M. Schneiders

589 Persistence of song types in Darwin’s
C. Yesson & R. Bernard

595 Life-history strategies associated with experience of losing
K. Hotta, T. Tanaka & T. Miyake

597 Predators are less likely to misclassify morphologically similar prey when their models are present
J. Delphin & G. D. Ruston

601 Breaking the trade-off: experimentally maximized bandwidth and repetition rate of echolocation calls as they approach prey
D. A. Schmieder, T. Kingston, R. Hashim & L. M. Mäthger

605 Differential sensitivity to conspecific and allosppecific cues in chimpanzees and humans: a comparative
A. Wilkinson, R. P. Swarth & M. Alfar

609 Taste-rejection behaviour by predators can promote variability in prey defences
C. C. Halsbeek & C. Rose

620 Costs and benefits of multi-male
A. Møller & B. M. Kappeler

621 Alarm calls elicit predator-specific
J. M. Møller

626 Vocal memory in male birds: who learns from whom?
L. A. Kelly & S. D. Nowak
