626 Vocal mimicry in male bowerbirds: who learns from whom?

620 Costs and benefits of multi-male taste-rejection behaviour by predators

597 Predators are less likely to misclassify masquerading prey when their models experience of losing

593 Ejaculatory strategies associated with persistence of song types in Darwin’s males of the orb-web spider Argiope

589 Comparative analysis of marine bat echolocation calls and humans: a comparative

585 Males of the end-west spider Argiope aurantia sacrifice themselves to reproductive success

579 Evidence for distributed light sensing in the skin of cuttlefish, are present

575 Role of visual cues in mate choice in Lepidoptera species

570 Migration of the lesser kestrel (Falco naumanni) through the Cape Peninsula

565 A flicker in Photuris: how do arthropod predators detect flashing females?

561 Adaptation to local conditions in the grasshopper Melanoplus cardui

557 Genomic evidence for the rapid evolution of adaptive coloration in the Hawaiian silversword

552 Evolutionary lizards: the potential for longterm survival of the pygmy leaf-toed gecko

547 Genetic evidence of illegal trade in the blood parasite Plasmodium falciparum.

543 Phylogeography of the Madagascan swiftlet, a threatened species

539 Promiscuous males: an adaptive strategy for small polygynandrous birds

535 Hypothalamic peptide hormone expression in the blackcap

530 Higher reproductive skew among birds than mammals in cooperatively breeding species

525 Genetic variation in the quail: an inbred population

518 Transferring passive learning from one context to another

513 Evolution of the shrew family

508 Population ecology of the eurasian lynx in the Baltic region

503 Individual specialists in a generalist population: results from a long-term agri-environment scheme uptake

496 DNA barcodes reveal species-specific ecological requirements in the giant kangaroo rat

492 DNA taxonomy of the South American river otter

487 Association between mammalian body-mass change and climate warming: implications for species’ responses to climate change

482 The feeding ecology of little auks raises questions about winter coalescence

475 Comment. No evidence for warming climate over the last 400 years

470 Marine biology

466 Comment. No evidence for warming climate over the last 400 years: a reply to R. B. Alley

462 The feeding ecology of little auks raises questions about winter coalescence

458 Comparative analysis of marine bat echolocation calls and humans: a comparative

453 Phylogeography of the Madagascan swiftlet, a threatened species

448 The evolution of species-specific social responses in the wild

443 Genetic evidence of illegal trade in the blood parasite Plasmodium falciparum.

438 Phylogeography of the Madagascan swiftlet, a threatened species

433 The role of genetic diversity in maintaining population structure

428 Comparative analysis of marine bat echolocation calls and humans: a comparative
