23 April 2011
volume 7 · number 2 · pages 161–320

Meeting reports
161 Plant signalling: the opportunities and dangers of chemical communication
R. E. Adler

162 Spatial ecology across scales
A. Hussey, S. Piersma & A. Momen

Animal behaviour
166 Comment: Blackawton bees: commentary on Blackawton, P. S. et al.
L. T. Maynard & N. Heming de Barra

168 Blackawton bees

171 Interspecific queen parasitism in a highly eusocial bee
T. Vorwergs, D. A. Alves, T. F. Franscy, J. Billen & V. Imparato-Fonseca

172 Differential outcomes of unilateral interferences at birth
A. de Boyer des Rochas, Y. Durier, V. Fechner, A. E. Fonseca, M. Ezzaouia, M. Hausberger & S. Henry

181 Observational learning in mustang cultural transmission chains
M. Childs, T. Stoddard & B. A. Mayntz

184 Odour-based nest recognition in the zebra finch (Taenopygia guttata), a colony-breeding songbird
R. A. Capers & E. T. Kroon

187 Vibroacoustic infection lowers fertile queen transfer in a moth
J. Lewis, E. J. Champion de Crepy, S. V. Mar, T. Praygros & N. Willy

190 Female promiscuity and early re-establishment predicts aggression in a social species
M. Wang & S. Baillie

194 Toadlet eggs compensate for poor offspring feeding capacity in a substantial hoovering bug
N. Baba, M. Itohama, T. Oshikawa, M. Hikasa, S. Nomotochiku & T. Utsumi

197 Electrical signalling of dominance in a wolf population of electric fish
V. Fuglev, H. Otteva & R. Krahe

Community ecology
201 Resource availability affects the structure of a natural bacterium-bacteriophage community
T. Pinto, G. Lapennetier, E. Martinet, J. Ramayr & M. E. Hulshap

Conservation biology
205 Decomposing phylogenetic entropy across animal and plant taxa
M. A. Muschen & M. Mouquet

Evolutionary biology
210 Opinion piece: On measuring selection in experimental evolution
L. Chevin

214 Colourful pollinator feathers resist bacterial degradation

218 The role of sexual selection during mating increases immune defence in adult fruit crickets
N. W. Bailey, B. Gray & M. Zak

221 Male dance moves that catch a woman’s eye
N. Notaro, S. McCarty, J. Proof, N. Caplen, J. Hohope & B. Fink

225 Eastern franzén Africa palaeoclimatic-mediated chameleon dispersal to the Seychelles islands
T. M. Toonament, K. A. Thoby, F. Cline, W. Bohm & M. Vences

229 An indigenous religious ritual selects for resistance to a livestock in a remote village
M. Talbin, Z. W. Calumbe, M. Phath, K. O. Wehrendt & C. C. Bosworth

233 Light enough to travel: migratory bats have smaller brains, but not larger hippocampi, than sedentary species
T. Y. Kopp & M. Racette

237 Performance of human groups in social foraging: the role of communication in consensus decision making
A. J. King, C. Naylor, J. Hodgson, A. Whaishoff, V. Suraner & S. Summer

241 Uneven distribution of cryptic parasitism and increasing tans of parasitic women
R. Pola

245 Interspecific symbiont transference centers a novel ecologial trait to the recipient insect
T. Tsuchida, R. Koga, S. Matsumoto & T. Fukatsu

249 Antimicrobial strength increases with group size: implications for social evolution

253 Existence for viable, non-clonal but fissioning, Blue communities
W. Booth, D. N. Johnson, S. Moore, C. Schal & J. I. Vargo

257 Evidence for genetically influenced cates determination in phylogenetically diverse species of the termite genus Reticulitermes
O. Kadile, M. Hiroi, S. Oshida, A. Aoun, M. Yoshida, T. Hayakawa & N. Lu

261 Larger taxa are associated with a higher level of polyandry, but a smaller number of offspring in the bee species (Tetraonula spatulata)
T. Tahed, D. J. Foster, D. J. Gilbert

265 Trematode parasites infect or die in small hosts
K. R. King, J. Jakub & C. M. Lively

269 Dietary protein content affects fall: body size and prey abundance in Thoroughbred racehorse breed
M. H. Ingles, A. Allen, M. C. Marcondes & C. C. Capelle

273 Mushroom’s spore size and time of fruiting are strongly related: is moisture important?

277 The evolution of sexuality in alkaloids bees: worker foraging by males
M. P. Wheeler, S. M. Tietje, S. M. Beban, G. S. Chownowsky & J. R. Cooper

Evolutionary developmental biology
281 Patterning of a compound eye on an extinct diprignet wing
A. Cheviron & S. R. Read

285 Predator cues alter the timing of developmental events in gastropod embryos
D. L. Randell, J. E. Smith, M. J. Coltart & J. J. Spence

Global change biology
288 Will fish swim under Southern Ocean acidification?

Marine biology
292 Fish mucous cocoon: the ‘mosquito nets’ of the sea
A. S. Crumlin, J. C. Rannev, T. Sinclair-Taylor, P. Vassil & C. E. Franklin

Paleontology
295 Unexpected resilience of species with temperature-dependent sex determination at the Cretaceous–Paleogene boundary
S. B. He, J. C. Hurley & M. Bilottarz

Population ecology
299 A ‘spur trade’ away from female hominid whale mother 10 000 km between breeding areas
P. L. McGuire & J. M. Ratcliffe

301 New evidence on the Palaeogene boundary

303 To breed or not to breed: a seabird’s response to extreme climatic events
S. Culley, P. F. Doherty Jr, J. A. Schneirb & G. D. Smirnoff

307 Eating the competition speeds up evolution

312 The bigger they come, the harder they fall: body size and prey abundance influence predator–prey ratios
S. Culley, N. Pettis & P. A. Stephens

Population genetics
316 The cosmopolitan maternal heritage of the Thoroughbred racehorse breed shows a significant contribution from British and Irish native races
