850 Different behavioural responses to anthropogenic noise by two closely related passerine birds
843 The cost of a bodyguard
840 Noisy human neighbours affect where urban monkeys live
833 Great flights by great snipes: long and fast non-stop migration over benign habitats
829 Memory processing in great apes: the effect of time and sleep
825 Navigating a tool end in a specific direction: do tool-use in bee (Apis mellifera) workers have a modal nature?
821 Social environment determines degree of chemical signalling in dominance relationships included in current interactions and experience carried over from previous groups
814 To fear or to feed: the effects of habituation over large geographical distances by a migratory bird
811 The stress of parenthood? Increased glucocorticoids in birds with experimentally enlarged broods
807 Chemical kin label in seabirds
804 Vertebrate palaeontology of Australasia
801 Synthesizing and databasing fossil evidence that permanent darkness beyond a '3 m gap' is the independent scientific academy founded in 1660

Animal behaviour

11 To fear or to feed: the effects of habituation over large geographical distances by a migratory bird
12 The ghost of social environments past: dominance relationships include current interactions and experience carried over from previous groups
13 To fear or to feed: the effects of habituation over large geographical distances by a migratory bird
14 The stress of parenthood? Increased glucocorticoids in birds with experimentally enlarged broods
15 Chemical kin label in seabirds
16 Vertebrate palaeontology of Australasia
17 Synthesizing and databasing fossil evidence that permanent darkness beyond a '3 m gap' is the independent scientific academy founded in 1660

Meeting reports

803 Synthesizing and databasing fossil calibrations: divergence dating and beyond
801 Vertebrate palaeontology of Australasia
800 Synthesizing and databasing fossil evidence that permanent darkness beyond a '3 m gap' is the independent scientific academy founded in 1660

23 December 2011

volumes 7 • number 6 • pages 801–960

909 Speciation in caves: experimental evidence that permanent darkness promotes reproductive isolation
908 Stress, HPA axis and glucocorticoids in birds with experimentally enlarged broods
906 Basal supersensitivity as a sex-specific immune constraint
905 Noisy human neighbours affect where urban monkeys live
903 The stress of parenthood? Increased glucocorticoids in birds with experimentally enlarged broods
902 Bacteriophage selection against a plasmid-encoded sex apparatus leads to immune constraint
901 Smoking bananas: does sugar make wimpy adults?
900 Chemical kin label in seabirds
899 Shame and honour drive cooperation
898 Sexual selection in Drosophila melanogaster: beyond genitalia
897 The predatory behaviour of the thylacine: assessment of man-eating or man-eat?/
896 Basal supersensitivity as a sex-specific immune constraint
895 Speciation in caves: experimental evidence that permanent darkness promotes reproductive isolation
894 Stress, HPA axis and glucocorticoids in birds with experimentally enlarged broods
893 The stress of parenthood? Increased glucocorticoids in birds with experimentally enlarged broods
892 Experimental evidence that permanent darkness promotes reproductive isolation
891 Stress, HPA axis and glucocorticoids in birds with experimentally enlarged broods
890 Speciation in caves: experimental evidence that permanent darkness promotes reproductive isolation
889 Shame and honour drive cooperation
888 Sexual selection in Drosophila melanogaster: beyond genitalia
887 The predatory behaviour of the thylacine: assessment of man-eating or man-eat?/
886 Basal supersensitivity as a sex-specific immune constraint
885 Speciation in caves: experimental evidence that permanent darkness promotes reproductive isolation
884 Stress, HPA axis and glucocorticoids in birds with experimentally enlarged broods
883 The stress of parenthood? Increased glucocorticoids in birds with experimentally enlarged broods
882 Experimental evidence that permanent darkness promotes reproductive isolation
881 Stress, HPA axis and glucocorticoids in birds with experimentally enlarged broods
880 Invited reply. A force–speed trade-off is not absolute
879 Memory processing in great apes: the effect of time and sleep
878 Comment. There is always a trade-off between speed and force in a lever system: comment on McHenry (2010)
877 Memory processing in great apes: the effect of time and sleep
876 Basal supersensitivity as a sex-specific immune constraint
875 African grey parrots (Psittacus erithacus) use inference by exclusion to find hidden food
874 Smoking bananas: does sugar make wimpy adults?
873 The predatory behaviour of the thylacine: assessment of man-eating or man-eat?/
872 Happy orang-utans live longer lives
871 African grey parrots (Psittacus erithacus) use inference by exclusion to find hidden food
869 Nesting breeding during infancy does not make vunpapa adults
868 Memory processing in great apes: the effect of time and sleep
867 Basal supersensitivity as a sex-specific immune constraint
866 Basal supersensitivity as a sex-specific immune constraint
865 Age-dependent inbreeding risk and offspring fitness costs in female black grouse
864 A new navigational mechanism mediated by retinal oscillations
863 Long-term cleaner fish presence affects growth of a coral reef fish
862 Basal supersensitivity as a sex-specific immune constraint
861 Noisy human neighbours affect where urban monkeys live
860 Invited reply. A force–speed trade-off is not absolute
859 Experimental manipulation of fertility reveals potential lactation costs in a free-ranging marsupial
858 Nesting breeding during infancy does not make vunpapa adults
857 Happy orang-utans live longer lives
856 A new navigational mechanism mediated by retinal oscillations
855 Consistent avoidance of human immune constraint
854 To fear or to feed: the effects of habituation over large geographical distances by a migratory bird
853 Great flights by great snipes: long and fast non-stop migration over benign habitats
852 Synthesizing and databasing fossil evidence that permanent darkness beyond a '3 m gap' is the independent scientific academy founded in 1660
851 Vertebrate palaeontology of Australasia
849 Experimental manipulation of fertility reveals potential lactation costs in a free-ranging marsupial
848 Nesting breeding during infancy does not make vunpapa adults
847 Happy orang-utans live longer lives
846 Basal supersensitivity as a sex-specific immune constraint
845 African grey parrots (Psittacus erithacus) use inference by exclusion to find hidden food
844 The stress of parenthood? Increased glucocorticoids in birds with experimentally enlarged broods
843 The cost of a bodyguard
842 Noisy human neighbours affect where urban monkeys live
841 The stress of parenthood? Increased glucocorticoids in birds with experimentally enlarged broods
840 Noisy human neighbours affect where urban monkeys live
