Professor Brian Charlesworth
Editors
Dr Joan Herbers
Dr Paul Snigirski
Publishing Editor
Charlotte Wray

Aims and Scope
Biology Letters is an empirical journal that publishes short, high-quality articles from across the biological sciences. The scope of Biology Letters is wide: publishing high-quality research articles and opinion pieces in any area of the biological sciences. However, we have particular strengths in the biology, evolution and ecology of whole organisms. We also publish in many other areas of biology, such as molecular biology and neurobiology, where these themes are relevant. We welcome articles that are of interest to a broad audience.

Selection criteria
The criteria for selection are scientific excellence, originality and interest across disciplines within biology. Papers are assessed by the Editorial Board for suitability before full peer-review. Their recommendations are passed to the Editor. The Editor is responsible for all editorial decisions and he makes these decisions based on the reports received from the referees and the Editorial Board.

Publishing format
Biology Letters are published regularly online and in bi-monthly print issues. Along with all Royal Society journals, we are committed to archiving and providing perpetual access. Although the printed version of Biology Letters is limited to 2500 words, there is the facility for Electronic Supplementary Material (ESM). Contents of the ESM might include details of methods; derivations of equations; large tables of data; DNA sequences and computer programs. However, the printed version must include enough detail to satisfy most non-specialist readers. Supplementary data up to 10MB is placed on the Society’s website free of charge. Larger datasets must be deposited in recognised public domain databases by the author.

Conditions of publication
Articles must not have been published previously, nor be under consideration for publication elsewhere. The main findings of the article should not have been reported in the mass media. Like many journals Biology Letters employs a strict embargo policy where the reporting of a scientific article by the media is embargoed until a specific date. The Editor has final authority in all matters relating to publication.

For further information on the Society’s activities, please contact the following departments on the extensions listed below:

- Research Support (UK grants and fellowships): 44 (0)20 7839 5565
- Research Housing (international fellowships): 2542
- International Travel Grants: 2555
- Newton International Fellowships: 2559
- Science Policy Centre
- General enquiries: 2555

Library and Information Services
- General enquiries: 2573
- Access to all journal content please visit the Biology Letters website at rbl.royalsociety.org

The Royal Society, the national academy of science of the UK and the Commonwealth, is at the cutting edge of science and innovation. We support many top young scientists, engineers and technologists, influence science policy debate and secure funding for university and school education.

Our mission: to expand knowledge and further the role of science and engineering in making the world a better place.

The Royal Society’s strategic priorities are to:

- Invest in future scientific leaders and in innovation
- Influence policymaking with the best scientific advice
- Engage science and mathematics education
- Increase access to the best science internationally

Join our mission: \( \text{royalsociety.org/events} \)

Electronic Submission Details
The Royal Society’s electronic submission and peer review service provides Biology Letters authors with the facility to submit their papers online. The service allows you to upload files in a reliable and user-friendly way, using a Web-based system. When your paper is received, an immediate acknowledgement is sent that details how you can track your contribution online.

Except as otherwise permitted under the Copyright, Designs and Patents Act, 1988, this publication may only be reproduced, stored or transmitted, in any form or by any means, with the prior permission in writing of the publisher, or in the case of reprographic reproduction, in accordance with the terms and conditions of a licence issued by the Copyright Licensing Agency: In particular, the Society permits the making of a single photocopy of an article from this issue (Sections 29 and 38 of this Act) for an individual for the purposes of research or private study.

SUBSCRIPTIONS
In 2012 Biology Letters (ISSN 1744-9561) will be published bimonthly, with six issues a year. Full details of subscription packages may be obtained either by contacting our journal fulfilment agent, Portland Customer Services, Commerce Way, Catthorpe, CO2 8HP; tel: +44 (0)1206 796351; fax: +44 (0)1206 793331; email: sales@portland-services.com or by visiting our website at rbl.royalsociety.org/subscribe. From 2008 personal subscriptions are available for this journal–see prices. Full ordering information can be obtained from Portland Customer Services. These rates apply to bona fide individual use only. They must be paid by personal cheque or credit card, and orders cannot be delivered to an institutional address. The Royal Society is registered Charity No 207043.
