547 When it is costly to have a caring mother:

537 Group size elicits specific physiological
care for kin: within-group relatedness and

530 Ambient noise increases missed detections in

526 Antifungal activity in thrips soldiers suggests

Crotalus

523 Cryptic sociality in rattlesnakes (C.

516 It is optimal to be optimistic about survival

512 Remote copulation: male adaptation to

505 Cross-hemisphere migration of a 25 g songbird

502 Rollers smell the fear of nestlings

500 Habitat associations of species show

506 Habitat stability affects dispersal and the

501 Cryptic asymmetry: unreliable signals mask

Biomechanics

551 Cryptic asymmetry: artefact or signal mask

550 Leading edge vortex in a slow-flying passerine

549 Community ecology

558 Plant radiation history affects community

557 Water severity predicts the timing of host

556 Disease drives high phylogenetic turnover among

553 Cryptic sociality in Myrmecia: evidence from the New Zealand

552 Animal behaviour

562 Environment drives high phylogenetic turnover among source-bacterial communities

561 Cryptic asymmetry: unreliable signals mask

560 Habitat stability affects dispersal and the
dispersal of species show

559 Long-term interdistributional stability in tropical forest

558 Plant radiation history affects community

557 Water severity predicts the timing of host

556 Disease drives high phylogenetic turnover among source-bacterial communities

554 Leading edge vortex in a slow-flying passerine

553 Cryptic sociality in Myrmecia: evidence from the New Zealand

552 Animal behaviour

562 Environment drives high phylogenetic turnover among source-bacterial communities

561 Cryptic asymmetry: unreliable signals mask

Biomechanics

551 Cryptic asymmetry: artefact or signal mask

550 Leading edge vortex in a slow-flying passerine

549 Community ecology

558 Plant radiation history affects community

557 Water severity predicts the timing of host

556 Disease drives high phylogenetic turnover among source-bacterial communities

553 Cryptic sociality in Myrmecia: evidence from the New Zealand
