547 When it is costly to have a caring mother: Long-term familiarity promotes joining in
540 Working against gravity: horizontal honeybee care for kin: within-group relatedness and
533 Ambient noise increases missed detections in
530 Antifungal activity in thrips soldiers suggests
526 Cryptic sociality in rattlesnakes (Crotalus horridus)
523 Opinion piece. Is more better? Polyploidy and
512 Remote copulation: male adaptation to
502 Rollers smell the fear of nestlings
495 Hermit crabs perceive the extent of their
492 Chicks, like children, spontaneously reorient
488 RNAi of the circadian clock gene
481 Ranavirus: past, present and future
480 Animal behavior
472 You get what you pay for: reward-specific trade-offs among direct and anti-mediated
468 You can’t have your cake and eat it too: how to
465 Environment drives high phylogenetic turnover among source-bacterial communities
462 Winter severity predicts the timing of host
457 Water severity predicts the timing of host
451 Cryptic asymmetry: unreliable signals mask
450 Leading edge vortex in a slow-flying passerine
448 Remote copulation: male adaptation to
444 Selection for life-history changes and intraspecific competition on the demographic
437 Hermit crabs perceive the extent of their
434 Chicks, like children, spontaneously reorient
431 Cryptic asymmetry: unreliable signals mask
420 Leading edge vortex in a slow-flying passerine
417 Observed mechanisms operating within extreme habitats: a case study of
416 Mind the gap: genetic distance increases with
413 Sinusoidal environmental fluctuations promote
410 Selective bird predation on the peppered
408 Speed, pacing strategy and aerodynamic
405 Divergent host-plant use promotes
401 Habitat associations of species show
398 Opinion piece. Is more better? Polyploidy and
395 Low dose ionizing radiation produces too few
390 Habitat associations of species show
387 Soil-mediated indirect impacts of an invasive
383 Winter severity predicts the timing of host
380 Habitat associations of species show
377 Habitat associations of species show
374 Leading edge vortex in a slow-flying passerine
370 On the internality and uniqueness of species from the external perspective
367 Winter severity predicts the timing of host
362 Environment drives high phylogenetic turnover among source-bacterial communities
360 Habitat associations of species show
357 Water severity predicts the timing of host
354 You get what you pay for: reward-specific trade-offs among direct and anti-mediated
350 Antifungal activity in thrips soldiers suggests
347 Cryptic asymmetry: unreliable signals mask
344 Adaptation for long-term flowering promotes joining in
340 Leading edge vortex in a slow-flying passerine
337 Habitat associations of species show
334 Habitat associations of species show
331 Habitat associations of species show
328 Habitat associations of species show
325 Cryptic sociality in rattlesnakes (Crotalus horridus)
323 Adaptational activity in thrips soldiers suggests
319 Care for kin within-group relatedness and
316 Habitat associations of species show
313 Leading edge vortex in a slow-flying passerine
