949 Secondary eyes mediate the response to
946 Learning outdoors: male lizards show
936 Social familiarity modulates personality
932 Maternal predator-exposure has lifelong
928 Environmental variability and acoustic
924 In the eye of the beholder: visual mate
921 Increased aggression during human
917 Proximity data-loggers increase the
910 Opinion piece. Pro-sociality without
897 Challenges in global biodiversity
894 Evolution of gliding in Southeast Asian
890 Evolutionary novelty in a rat with no molars
883 Facultative parthenogenesis discovered in
879 Evidence for Permo-Triassic colonization of
875 Evidence that gestation duration and
872 Daphnia magna shows reduced infection
870 Phylogeny
866 Endophytic bacteria as a source of
862 Evolutionary novelty in a rat with no molars
855 High elevation in the Andes: an in situ
851 Towards a general life-history model of the
847 Lung collapse in the diving sea lion: hold
840 Comment. The relationship between
832 Histology shows that elongated neck
828 Evolution of the turtle bauplan: the
823 Depolymerization of actin facilitates
819 Social facilitation of food sharing by
dominant and subordinates in Aplocheilus
lilae: a test of the strong group size
hypothesis
815 Spiny lobsters show plasticity in the
configuration of the lobular plate of the
second maxillipeds
811 Social foraging in the dung beetle, Onthophagus
taeniatus: evidence for memory
807 Challenges in global biodiversity
804 Conservation physiology of marine fishes:
800 Conservation and solutions that cross
sociology, politics, economics and ecology
799 Environmental change and the evolution of
the turtle bauplan
798 The roots of terrestrialization: the temporal
and spatial evolution of land plant
1016 Sediment suppresses herbivory across a
1013 Population structure and genotype
1010 Metabolic effects of CO2 anesthetization in
1007 Migration constraints on yolk precursor
1002 Congruent responses to weather variability
in high Arctic butterflies
983 Facultative parthenogenesis discovered in
979 Evidence for Permo-Triassic colonization of
975 Evidence that gestation duration and
972 Daphnia magna shows reduced infection
968 Fire creates host plant patches for monarch
butterflies
964 Causes of hatching failure in endangered
birds
961 Socially-structured superorganism: predicting the survival,
persistence of secondary consumer species
958 Evolutionary novelty in a rat with no molars
954 Social foraging in the dung beetle, Onthophagus
taeniatus: evidence for memory
951 Towards a general life-history model of the
948 Evolutionary novelty in a rat with no molars
945 Population connectivity and decline in a
1071 Stress associated with group living in a
942 Thalassodiscus longifilis has an endosymbiotic
940 Comment. The relationship between
932 Maternal predator-exposure has lifelong
