Supplemental Material: Predicting the distribution of oceanic-stage Kemp’s ridley sea turtles

Nathan F. Putman, Katherine L. Mansfield, Ruoying He, Donna J. Shaver, Philippe Verley

Supplemental Figure 1:

Map of locations discussed within the main article. Names in black indicate that the locations are on land, names in blue indicate that locations are in the ocean. White squares indicate the approximate locations of particle release sites in the simulations, which correspond to the release locations of hatchling Kemp’s ridley sea turtles. Not all squares are visible due to the close proximity of multiple release sites. Blue shading indicates the water depth (see scale).
